All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Secondary aluminum production.
Estimated Number of Respondents: 1,624.
Frequency of Response: On occasion, initially and semiannually.
Estimated Total Annual Hour Burden: 93,725.
Estimated Total Annual Cost: \$8,163,900, which includes \$7,938,150 in labor costs, \$84,000 in capital/startup costs, and \$141,750 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the labor hours in this ICR as compared to the previous one. This is due to two considerations: (1) The regulations have not changed over the past three years and do not anticipate changes over the next three years; and (2) the growth rate for the industry is very low, negative or nonexistent, so

there is no significant change in the overall burden. It should be noted that there is a change in the cost burden compared to the previous ICR. The change is due to minor calculation errors. This ICR reflects the corrections and updates of the labor cost figure.
