Background: The Commission has prepared and published annual reports on U.S. trade shifts in selected industries/commodity areas under investigation No. 332-345 since 1993. Beginning in 2004, the Commission converted the report to an exclusively web-based format (with added focus on sectoral issues) that can be accessed electronically. The initial notice of institution of this investigation was published in the **Federal Register** of September 8, 1993 (58 FR 47287). The Commission expanded the scope of this investigation to cover services trade in a separate report, which it announced in a notice published in the **Federal Register** of December 28, 1994 (59 FR 66974). The merchandise trade report has been published in the current series under investigation No. 332-345 annually since September 1993.

This year's Web-based format identifies the key trends affecting principal foreign markets and 10 major U.S. sectors.

By order of the Commission.

Issued: August 6, 2009.

Secretary to the Commission.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft guide in the agency’s “Regulatory Guide” series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC’s regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide (DG), entitled, “Pressure-Sensitive and Tamper-Indicating Device Seals for Material Control and Accounting Use,” is temporarily identified by its task number, DG-5029, which should be mentioned in all related

correspondence. The NRC requires certain licensees to use tamper-indicating devices (TIDs) for material control and accounting (MC&A) and for physical security of special nuclear material (SNM). Title 10, part 70, “Domestic Licensing of Special Nuclear Material,” of the *Code of Federal Regulations* (10 CFR part 70) requires, in part, that no person subject to the regulations in 10 CFR part 70 may receive title to, own, acquire, deliver, receive, possess, use, or transfer SNM, except as authorized in a license issued by the NRC.

This regulatory guide (RG) replaces the existing RG 5.10, “Selection and Use of Pressure-Sensitive Seals on Containers for Onsite Storage of Special Nuclear Material,” issued July 1973 and the existing RG 5.15, “Tamper-Indicating Seals for the Protection and Control of Special Nuclear Material,” issued March 1997, with a new title, “Pressure-Sensitive and Tamper-Indicating Device Seals for MC&A Use.” RG 5.10 refers to a pressure-sensitive (PS) seal that is no longer in general use and may no longer be commercially available. RG 5.15 refers to tamper-indicating devices (TID) including PS seals. As a replacement, this guide describes a number of improved TIDs and PS seals developed in recent years primarily in response to commercial interests outside the nuclear industry.

Comments would be most helpful if received by October 13, 2009. Comments received after that date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date.
