

amendment. The staff considered impacts to public and occupational exposures, groundwater, endangered and threatened species, historic and cultural resources, socioeconomic conditions, noise, transportation, waste management, soils, and air quality. This proposed action does not seek to increase the wellfield areas, land application area, or the currently authorized production limits. Furthermore, PRI will not open any new wellfields as a result of this licensing action, beyond those currently addressed by its license. Therefore, the staff does not expect the proposed action to impact public and occupational exposures, groundwater, endangered or threatened species, historic and cultural resources, socioeconomic conditions, and noise.

NRC staff does not expect significant environmental impacts to transportation, waste management,

soils, and air quality. The additional traffic volume of approximately 1 truck per day is relatively small compared to the existing traffic volumes on the roadways. Therefore, the additional traffic resulting from shipment of IX resin to and from SR-HUP is not expected to significantly contribute to the congestion or accident rates on these roadways. Vehicle emissions from the additional traffic are not expected to significantly contribute to the vehicle emissions on these roadways. Since PRI has committed in the license amendment request to remain below the currently approved flow rate and yellowcake production limits, the amount of liquid and solid effluents generated at the facility will remain at or below current maximum estimated levels. Therefore, the proposed action is not expected to significantly impact waste management practices at SR-HUP.

**III. Finding of No Significant Impact**

On the basis of the EA, NRC has concluded that there are no significant environmental impacts from the proposed amendment and has determined that there is no need to prepare an environmental impact statement.
