SUPPLEMENTARY INFORMATION:

On December 2, 2008, the FAA published the final rule entitled “Revisions to Digital Flight Data Recorder Regulations for Boeing 737 Airplanes and for All Part 125 Airplanes” (73 FR 73171). This rule amended the regulations governing flight data recorders to increase the number of digital flight data recorder parameters for all Boeing 737 series airplanes manufactured after August 18, 2000. This change was based on safety recommendations from the National Transportation Safety Board following its investigations of two accidents and several incidents involving 737s. The final rule also adopted a prohibition on deviations from flight recorder requirements for all airplanes operated under part 125.

The final rule contained information collection requirements that the Office of Management and Budget (OMB) had not yet approved as of the date of publication. In the “Paperwork Reduction Act” section of the final rule, the FAA noted that the agency may not collect or sponsor the collection of information, nor may it impose an information collection requirement, unless it displays a currently valid OMB control number.

In accordance with the Paperwork Reduction Act, OMB approved that request on April 3, 2009, and assigned the information collection OMB Control Number 2120–0616. The FAA request was approved by OMB without change and expires on April 30, 2012. This notice is being published to inform affected parties of the approval and to announce that the information collection requirements in the final rule entitled “Revisions to Digital Flight Data Recorder Regulations for Boeing 737 Airplanes and for All Part 125 Airplanes” will become effective when this notice is published in the **Federal Register**.

Issued in Washington, DC, on August 17, 2009.

I. Background

On April 20, 2009 (74 FR 17934), EPA proposed to approve requirements into the OCS Air Regulations pertaining to Santa Barbara County APCD. These requirements are being promulgated in response to the submittal of rules from this California air pollution control agency. EPA has evaluated the proposed requirements to ensure that they are rationally related to the attainment or maintenance of federal or state ambient air quality standards or Part C of title I of the Act, that they are not designed expressly to prevent exploration and development of the OCS and that they are applicable to OCS sources. 40 CFR 55.1. EPA has also evaluated the rules to ensure that they are not arbitrary or capricious. 40 CFR 55.12(e). In addition, EPA has excluded administrative or procedural rules.

Section 328(a) of the Act requires that EPA establish requirements to control air pollution from OCS sources located within 25 miles of states' seaward boundaries that are the same as onshore requirements. To comply with this
