

## V. Criteria for Awarding the Prize

### Technical Evaluation Criteria for Hydrogen Storage Materials

Breakthrough materials that meet the following material-level criteria:

- Goal is for a material that has the potential to be an on-board rechargeable hydrogen storage material.
- Gravimetric capacity of greater than 7.5 weight percent releasable hydrogen:
  - Reversible H<sub>2</sub> capacity between -40 to +85 degrees C, and between 1.5 to 150 bar H<sub>2</sub> pressure.
  - Volumetric capacity of greater than 70 g/liter total releasable hydrogen:
    - *i.e.*, total volume of H<sub>2</sub> ab/adsorbed by the solid plus the pressurized hydrogen contained within the pore spaces all divided by the total sample volume including the material's skeletal volume.
  - Charging kinetics: greater than or equal to  $4 \times 10^{-4}$  (*i.e.* 0.0004) grams of hydrogen per gram of material per second:
    - Charging kinetics are to be measured with an inlet hydrogen gas temperature of between -40 to +85 degrees C and an inlet hydrogen pressure of not greater than 150 bar.
    - Discharge kinetics: greater than or equal to  $2 \times 10^{-5}$  (*i.e.* 0.00002) grams of hydrogen per gram of material per second:
      - Discharge kinetics are to be measured at a sample temperature between -40 to +85 degrees C and with an outlet hydrogen pressure of greater than or equal to 1.5 bar.
    - Cycle life: 100 cycles:
      - At completion of 100 charge/discharge cycles from less than 5% to greater than 95% of reversible capacity, the sample's reversible capacity must still be greater than or equal to 95% of the gravimetric capacity target (*i.e.*  $\geq 0.95$  times 7.5 wt.% or  $\geq 7.1$  wt.%).

*Final test results and award qualifications.* Performance data must be submitted on an entered material demonstrating the principal requirements from above, based on data obtained by an independent laboratory. The participant must provide at least a 10 gram sample of the material(s) for independent verification of the above criteria by a laboratory specified by the Panel of Judges in consultation with DOE. The Panel of Judges will evaluate the test results and determine if there is a winner and honorable mentions. An award will be made only if all the technical evaluation criteria are met or exceeded. In the case of multiple entries exceeding all of the performance criteria in the final test results, the entry with the highest gravimetric capacity will be the winner. In the case that two or more

entries have the same highest gravimetric capacity, then the entry with the highest result for the above cycle life test will be declared the winner. Further details are provided on the criteria, scoring and rules in the H-Prize Rules and Requirements document at <http://hydrogenprize.org>.

## VI. Cancellation and Team Disqualification

*A participant may be disqualified for the following reasons:*

- At the request of the registered participant or team leader;
- Failure to meet or maintain eligibility requirements (*note* that at the time of the prize award, if it is determined that a participant has not met or maintained all eligibility requirements, they shall be disqualified without regard to H-Prize Competition performance);
- Failure to comply with H-Prize Rules and Requirements;
- Failure to submit required documents or materials on time;
- Fraudulent acts, statements or misrepresentations involving any H-Prize participation or documentation; or,
- Violation of any Federal, State or local law or regulation inconsistent with the H-Prize Competition.

*Cancellation.* DOE reserves the right to cancel this prize program at any time prior to the completion of materials' testing by the independent third party laboratory.

**What Information Is EPA Particularly Interested in?**

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the

proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

**What Should I Consider When I Prepare My Comments for EPA?**

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Offer alternative ways to improve the collection activity.

6. Make sure to submit your comments by the deadline identified under **DATES**.

7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and Federal Register citation.

**What Information Collection Activity or ICR Does This Apply to?**

*Affected entities:* Entities potentially affected by this action are those States/Tribes requesting assumption of the Clean Water Act section 404 permit program; States/Tribes with approved assumed programs; and permit applicants in States/Tribes with assumed programs.

*Title:* Clean Water Act Section 404 State-Assumed Programs.

*ICR Numbers:* EPA ICR No. 0220.11, OMB Control No. 2040-0168.

*ICR status:* This ICR is currently scheduled to expire on February 28, 2010. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB

control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the Federal Register when approved, are listed in 40 CFR part 9, are displayed either by publication in the Federal Register or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

*Abstract:* Section 404(g) of the Clean Water Act authorizes States [and Tribes] to assume the section 404 permit program. States/Tribes must demonstrate that they meet the statutory and regulatory requirements (40 CFR part 233) for an approvable program. Specified information and documents must be submitted by the State/Tribe to EPA to request assumption. Once the required information and documents are submitted and EPA has a complete assumption request package, the statutory time clock for EPA's decision to either approve or deny the State/Tribe's assumption request starts. The information contained in the assumption request is made available to the other involved Federal agencies (Corps of Engineers, U.S. Fish and Wildlife Service, and National Marine Fisheries Service) and to the general public for review and comment. These minimum information requirements are based on the information that must be submitted when applying for a section 404 permit from the Corps of Engineers. [33 CFR 328].

States/Tribes must be able to issue permits that comply with the 404(b)(1) Guidelines, the environmental review criteria. States/Tribes and the reviewing Federal agencies must be able to review proposed projects to evaluate, avoid, minimize and compensate for anticipated impacts. EPA's assumption regulations establish recommended elements that should be included in the State/Tribes's permit application, so that sufficient information is available to make a thorough analysis of anticipated impacts. These minimum information requirements are based on the information that must be submitted when applying for a section 404 permit from the Corps of Engineers (CWA section 404(h)(1)(A)(i) and section 404(j) and 40 CFR 230.10, 233.20, 233.21, 233.34, and 233.50) (33 CFR 325.1).

EPA is responsible for oversight of assumed programs to ensure that State/Tribal programs are in compliance with applicable requirements and that State/Tribal permit decisions adequately consider, avoid, minimize and compensate for anticipated impacts. States/Tribes must evaluate their

programs annually and submit the results in a report to EPA. EPA's assumption regulations establish minimum requirements for the annual report (40 CFR 233.52).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15 and are identified on the form and/or instrument, if applicable.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 520 hours to request program assumption, 5 hours to complete a permit application and 80 hours to prepare the annual report per assumed program. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

**Estimated total number of potential respondents:** 2 States/Tribes to request program assumption; 20,000 permit applicants, 4 assumed States/Tribes.

**Frequency of response:** On occasion.

**Estimated total average number of responses for each respondent:** One time to request assumption; one time when requesting a permit; annually for the annual permit and annual report.

**Estimated total annual burden hours:** 101,360 (520 hours to request assumption times two States/Tribes (1,040 hours); 20,000 permit applicants times 5 hours per application (100,000 hours); 80 hours per annual report times 4 States/Tribes (320 hours).

**Estimated total annual costs:** \$45,120 (includes \$0 annualized capital and O&M costs).

### Are There Changes in the Estimates From the Last Approval?

There are changes in the estimates from the last approval. These changes are to account for increases in wages.

### What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
