Most of the collections in this Information Collection Request (ICR)

require service providers to provide information to SSA for such tasks as selecting a payment system or requesting payments for helping the beneficiary achieve certain work goals. Most of the categories of information collected in this ICR are necessary for SSA to: (1) Comply with the Ticket to Work legislation, and (2) provide proper oversight of the program. Federal Transit Administration

[Docket Number: FTA-2009-0036]

Additional Final Guidance on New Starts/Small Starts Policies and Procedures

AGENCY: Federal Transit Administration (FTA), DOT.
ACTION: Response to comments; final guidance.

SUMMARY: The purpose of this notice is to convey additional 2009 final guidance on New Starts/Small Starts policies and procedures. On July 29, 2009, FTA announced in the **Federal Register** the availability of proposed guidance and requested public

comment. FTA received a total of 15 comments from transit agencies, metropolitan planning organizations, labor unions, advocacy groups, and other interested parties. After reviewing the public comments, FTA is issuing final guidance, which is included at the end of this notice.

DATES: Unless otherwise stated in this notice, this final guidance is effective September 2, 2009.

FOR FURTHER INFORMATION CONTACT: Elizabeth Day, Office of Planning and Environment, telephone (202) 366-5159 and Christopher Van Wyk, Office of Chief Counsel, telephone (202) 366-1733. FTA is located at 1200 New Jersey Ave., SE., East Building, Washington, DC 20590. Office hours are from 8:30 a.m. to 5 p.m., EST, Monday through Friday, except Federal holidays.

Organization

The proposed guidance issued on July 29, 2009 covered the following three topic areas: (a) Proposed policy changes; (b) clarification to existing policies and procedures; and (c) potential changes to FTA internal practices for managing the New Starts and Small Starts program.

This guidance first presents and responds to comments for area (a), proposed policy changes, for which the following three proposed policy changes are presented: (1) Local financial commitment rating; (2) New Starts and Small Starts "other" factors criteria; and (3) New Starts project planning horizon year. The second section of the guidance presents and responds to comments regarding area (b), clarification to existing policies and procedures, and addresses: (1) Documentation of uncertainties; and (2) alternate ridership and transportation user benefits estimation methods. These responses to comments are provided to further clarify existing policy. The third section of the guidance presents and responds to comments regarding area (c), potential changes to FTA internal practices for managing the New Starts and Small Starts program, specifically, expanded use of pre-award authority and letters of no prejudice (LONPs). The fourth section presents and responds to submitted comments not directly related to any of the three areas covered in the

proposed guidance. Following the responses to comments for each of these areas, the final guidance and a description of changes to FTA internal practices are articulated in full.

Proposed Policy Changes—Response to Comments

1. Local Financial Commitment Rating

In the proposed guidance, FTA suggested eliminating the policy of considering the degree to which a project employs innovative contractual agreements in the evaluation and rating of the operating financial plan under the local financial commitment criterion. Specifically, FTA proposed eliminating the policy of increasing the operating financial plan rating when project sponsors provide evidence that the operations and maintenance for the proposed project will be contracted out or when there is evidence that an opportunity had been given for contracting out but the project sponsor had substantive reasons for not doing so.

Of the 15 comments received, 12 expressed general support for the proposal. Of the remaining respondents, two did not directly address the proposal and one expressed concern with the proposal. The latter comment is addressed below.

Comment: One respondent noted that public investments in transportation, including New Starts and Small Starts projects, might trigger reimbursement clauses in the public/private contracts of competing infrastructure. For example, a new light rail line may cause automobile commuters to shift from a privately operated toll road to public transit. Depending on the terms of the toll road public/private partnership contract, such a shift could trigger a reimbursement clause. The commenter suggested that the cost of the example light rail line should, therefore, include the cost of reimbursing the private entity operating the example toll road. The respondent encouraged FTA to rethink this proposal to the extent that it would exclude information on the existence of infrastructure privatization terms that would increase the costs of new or improved public transit projects.
