#### Notice of Record of Decision for Norfolk Harbor Channel Dredging, Norfolk and Portsmouth, VA

**AGENCY:** Department of the Navy, DoD.

**ACTION:** Notice.

**SUMMARY:** The Department of the Navy (DON), after carefully weighing the operational and environmental consequences of the proposed action, announces its decision to deepen approximately five miles of Norfolk Harbor Channel, the Federal navigational channel in the Southern Branch of the Elizabeth River, separating Norfolk and Portsmouth, Virginia. Dredging in the heavily-used waterway would occur from the Lamberts Point Deperming Station in the Lamberts Bend Reach, south to Naval Support Activity Norfolk Naval Shipyard, commonly referred to as the Norfolk Naval Shipyard (NNSY), in the Lower Reach. Dredged material would be placed at The U.S. Army Corps of Engineers' (USACE) Craney Island Dredged Material Management Area (CIDMMA). The deepening project will establish continuously safe and expeditious transit routes for U.S. Naval Ships to Lamberts Point Deperming Station and NNSY. Dredging would occur completely within the existing USACE-maintained federal navigation channel. In its decision, the Navy considered applicable executive orders, including an analysis of the effects of its actions in compliance with the Endangered Species Act, the Coastal Zone Management Act, and the National Historic Preservation Act, and the requirements of Executive Order (EO) 12898, *Federal Actions to Address Environmental Justice in Minority Populations and Low Income Populations* and EO 13045, *Protection of Children from Environmental Health Risks and Safety Risks*.

The proposed action will be accomplished as set out in Alternative A, described in the Final Environmental Impact Statement (EIS) as the preferred alternative. Implementation of the preferred alternative could begin immediately.

**SUPPLEMENTARY INFORMATION:** The Record of Decision (ROD) has been distributed to all those individuals who requested a copy of the Final EIS and agencies and organizations that received a copy of the Final EIS. The full text of the Navy's ROD is available for public viewing on the project Web site at <http://www.norfolkredgingeis.com>, along with copies of the Final EIS and supporting documents. Single copies of the ROD will be made available upon request by contacting Ms. Caren Hendrickson, Naval Facilities Engineering Command Mid-Atlantic, telephone 757-444-1030.

### Western Area Power Administration

#### Notice of Cancellation of the Transmission Agency of Northern California Transmission Project, Environmental Impact Statement

**AGENCY:** Western Area Power Administration, DOE.

**ACTION:** Cancellation of Transmission Agency of Northern California Transmission Project Environmental Impact Statement.

**SUMMARY:** Western Area Power Administration (Western), an agency of the Department of Energy (DOE), is canceling preparation of the Environmental Impact Statement/

Environmental Impact Report (EIS/EIR) for construction, operation, and maintenance of the proposed Transmission Agency of Northern California (TANC) Transmission Project, which would have included building and upgrading over 600 miles of 230-kilovolt (kV) and 500-kV transmission lines and associated equipment and facilities in northern California.

**FOR FURTHER INFORMATION CONTACT:** For further information, please contact Mr. David Young, NEPA Document Manager, Western Area Power Administration, Sierra Nevada Region, 114 Parkshore Drive, Folsom, CA 95630, telephone (916) 353-4777, fax (916) 353-4772, or e-mail [TTPEIS@wapa.gov](mailto:TTPEIS@wapa.gov). For general information on DOE's NEPA review procedures or status of a NEPA review, contact Ms. Carol M. Borgstrom, Director of NEPA Policy and Compliance, GC-20, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, telephone (202) 586-4600 or (800) 472-2756.

**SUPPLEMENTARY INFORMATION:** On February 23, 2009, Western issued a Notice of Intent to prepare an EIS/EIR for the construction, operation, and maintenance of the TANC Transmission Project (74 FR 8086).<sup>1</sup> The project, as proposed, would have included building and upgrading over 600 miles of 230-kV and 500-kV transmission lines and associated equipment and facilities in northern California. In its Notice of Intent, Western described the schedule for scoping meetings for the EIS/EIR, and advised the public that comments regarding the scope of the EIS/EIR were due by April 30, 2009. Western held all public scoping meetings as scheduled. Because of requests from agencies and the public for more time to comment, Western extended the scoping period twice, with a final comment closing on July 30, 2009.

On July 15, 2009, the TANC Commission voted to terminate proceeding further with the environmental process and to stop development work for the TANC Transmission Project. On August 3, 2009, Western received notification from TANC, terminating its agreement with Western to prepare the EIS/EIR. Termination of the agreement terminates Western's obligation to prepare the EIS/EIR and involvement in the TANC Transmission Project. As a result, Western has ceased preparation of the EIS/EIR.

<sup>1</sup> On July 1, 1996, DOE's Assistant Secretary for Environmental, Safety and Health delegated to Western's Administrator, the authority to approve EISs for integrating main transmission system additions.
