

ADDRESSES: Comments should be addressed to Director, Division of Human Resource Management, National Science Foundation, Room 315, 4201 Wilson Boulevard, Arlington, VA 22230.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph F. Burt at the above address or (703) 292-8180.

SUPPLEMENTARY INFORMATION: The membership of the National Science Foundation's Senior Executive Service Performance Review Board is as follows:

Cora B. Marrett, Acting Deputy Director, Chairperson.

Anthony A. Arnolie, Director, Office of Information and Resource Management and Chief Human Capital Officer.

Richard A. Behnke, Head, Upper Atmosphere Research Section.

Deborah L. Crawford, Deputy Assistant Director for Computer and Information Science and Engineering.

Deborah F. Lockhart, Deputy Director, Division of Mathematical Sciences.

Martha A. Rubenstein, Director, Budget Division.

David A. Ucko, Deputy Director, Division of Research on Learning in Formal and Informal Settings.

Dated: September 3, 2009.

Joseph F. Burt,

Director, Division of Human Resource Management.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC-2009-0218]

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The NRC published a **Federal Register** Notice with a 60-day comment period on this information collection on June 3, 2009.

1. *Type of submission, new, revision, or extension:* Extension.

2. *The title of the information collection:* Nuclear Material Events Database (NMED) for the Collection of Event Report, Response, Analyses, and Follow-up Data on Events Involving the Use of Atomic Energy Act (AEA) Radioactive Byproduct Material.

3. *Current OMB approval number:* 3150-0178.

4. *The form number if applicable:* N/A.

5. *How often the collection is required:* Agreement States are requested to provide copies of licensee material event reports electronically or by hard copy to NRC within 30 days of receipt from their licensee. In addition, Agreement States are requested to report events that may pose a significant health and safety hazard to the NRC Headquarters Operations Officer within the next working day of notification by an Agreement State licensee.

6. *Who will be required or asked to report:* Current Agreement States and any State receiving Agreement State status in the future.

7. *An estimate of the number of annual responses:* 669.

8. *The estimated number of annual respondents:* 35.

9. *An estimate of the total number of hours needed annually to complete the requirement or request:* 689 hours for all existing Agreement State reporting.

10. *Abstract:* NRC regulations require NRC licensees to report incidents and events involving the use, transportation and security of radioactive byproduct material, and source material, such as those involving radiation overexposures, leaking or contaminated sealed source(s), release of excessive contamination of radioactive material, lost or stolen radioactive material, equipment failures, abandoned well logging sources and medical events. Agreement State licenses are also required to report these events to their individual Agreement State regulatory authorities under compatible Agreement State regulations. NRC is requesting that the Agreement States provide information to NRC on the initial notification, response actions, and follow-up investigations on events involving the use (including suspected theft or terrorist activities) of nuclear materials regulated pursuant to the Atomic Energy Act. The event information should be provided in a uniform electronic format, for assessment and identification of any facilities/site specific or generic safety concerns that could have the potential to impact public health and safety. The identification and review of safety

concerns may result in lessons learned, and may also identify generic issues for further study which could result in proposals for changes or revisions to technical or regulatory designs, processes, standards, guidance or requirements.

A copy of the final supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O-1 F21, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by October 13, 2009. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date. NRC Desk Officer, Office of Information and Regulatory Affairs (3150-0178), NEOB-10202, Office of Management and Budget, Washington, DC 20503.

The Acting NRC Clearance Officer is Tremaine Donnell, (301) 415-6258.

Dated at Rockville, Maryland, this 3rd day of September 2009.

For the Nuclear Regulatory Commission.

Tremaine Donnell,

Acting NRC Clearance Officer, Office of Information Services.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2009-0314; Docket No. 50-461]

Exelon Generation Company, LLC; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Exelon Generation Company, LLC (the licensee) to withdraw its June 15, 2009 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML091660580), application for proposed amendment to Facility Operating License No. NPF-62 for the Clinton Power Station, Unit No. 1, located in DeWitt County.

The proposed amendment would have eliminated the requirement for main steamline isolations on high turbine building temperatures from

Technical Specifications Section 3.3.6.1, "Primary Containment and Drywell Isolation Instrumentation," Table 3.3.6.1-1.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on July 16, 2009 (74 FR 34594-34596). However, by letter dated August 4, 2009, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated June 15, 2009, and the licensee's letter dated August 4, 2009 (ADAMS Accession No. ML092170159), which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, or 301-415-4737 or by e-mail to pdr.resource@nrc.gov.

Dated at Rockville, Maryland, this 2nd day of September 2009.

For the Nuclear Regulatory Commission.

Cameron S. Goodwin,

Project Manager, Plant Licensing Branch III-2, Division of Operating Reactor Licensing Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-391; NRC-2008-0369]

Tennessee Valley Authority, Watts Bar Nuclear Station, Unit 2; Notice of Intent To Prepare a Supplement to the Operating License Final Environmental Statement and Conduct Scoping Process

Tennessee Valley Authority (TVA) has submitted an application for an Operating License for Watts Bar Nuclear Station Unit 2 (WBN2). WBN2 is located in Rhea County, Tennessee, on the Tennessee River. The application for the operating license, dated June 30, 1976, was submitted pursuant to Title 10 of the *Code of Federal Regulations* (10

CFR) Part 50. An updated operating license was submitted on March 4, 2009. The WBN Unit 2 Final Supplemental Environmental Impact Statement for the Completion and Operation of WBN Unit 2 (June 2007) (FSEIS) was submitted to the U.S. Nuclear Regulatory Commission (NRC) on February 15, 2008 (Agencywide Documents Access and Management System (ADAMS) Accession Number ML080510469). The proposed action in response to the updated application is the issuance of an operating license that would authorize TVA to possess, use, and operate a second lightwater nuclear reactor (the facility), Watts Bar Nuclear Plant (WBN) Unit 2, located on the applicant's site in Rhea County, Tennessee. The unit would operate at a steady-state power level of 3,411 megawatts thermal. Alternatives to the proposed action include the denial of an operating license or issuance of a license for a different power level. The purpose of this notice is to inform the public that a supplement to the final environmental statement (FES) related to the review of the license application will be prepared in accordance with 10 CFR 51.92 and to provide the public an opportunity to participate in the environmental scoping process, as defined in 10 CFR 51.29. In addition, as outlined in 36 CFR 800.8, "Coordination With the National Environmental Policy Act," the NRC plans to coordinate compliance with Section 106 of the National Historic Preservation Act in meeting the requirements of the National Environmental Policy Act of 1969 (NEPA).

TVA submitted the FSEIS on February 15, 2008, as part of the updated application. The FSEIS is publicly available at the NRC Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike, Rockville, Maryland, 20852, or from the NRC's ADAMS. The ADAMS Public Electronic Reading Room is accessible at <http://adamswebsearch.nrc.gov/dologin.htm>. The ADAMS Accession Number for the FSEIS is ML080510469. In addition, TVA provided supplemental information to the FSEIS in two additional submittals: Watts Bar Nuclear Plant (WBN)—Unit 2—Final Supplemental Environmental Impact Statement—[response to] Request for Additional Information dated July 2, 2008 (ML081850460), and Watts Bar Nuclear Plant (WBN) Unit 2—Final Supplemental Environmental Impact Statement—Severe Accident Management Alternatives dated January 27, 2009 (ML090360706). Persons who do not have access to ADAMS, or who

encounter problems in accessing the documents located in ADAMS, should contact the NRC's PDR reference staff by telephone at 1-800-397-4209, or 301-415-4737, or by e-mail at pdr.resource@nrc.gov. The FSEIS may also be viewed on the Internet at <http://www.nrc.gov/reactors/plant-specific-items/watts-bar/key-correspondence.html>.

This notice advises the public that the NRC intends to gather the information necessary to prepare a supplement to the WBN2 Final Environmental Statement. The matters to be addressed in the supplement include evaluation of new and significant circumstances or information, relevant to environmental concerns, that developed after the 1978 FES (ADAMS Accession Number ML082560457). This notice is being published in accordance with NEPA and the NRC's regulations found in 10 CFR Part 51.

The NRC will first conduct a scoping process for the supplement to the FES and, as soon as practicable thereafter, will prepare a draft supplement to the FES for public comment. Participation in the scoping process by members of the public and local, State, Tribal, and Federal government agencies is encouraged. The scoping process for the supplement to the FES as described in 40 CFR 51.29(a)(1)-(8) will be used to accomplish the following:

1. Define the proposed action which is to be the subject of the supplement, using the provision of 10 CFR 1502.4.
2. Determine the scope of the supplement and identify the significant issues to be analyzed in depth.
3. Identify and eliminate from detailed study those issues that are peripheral or that are not significant.
4. Identify any environmental assessments and EISs that are being, or will be, prepared which are related to, but are not part of, the scope of the supplement.
5. Identify other environmental review and consultation requirements related to the proposed action so that other required analyses may be prepared concurrently and integrated with the supplement.
6. Indicate the relationship between the timing of the preparation of the environmental analyses and the Commission's tentative planning and decision-making schedule.
7. Identify any cooperating agencies and, as appropriate, allocate assignments for preparation and schedules for completing the supplement to the FES.
8. Describe how the supplement to the FES will be prepared, including any contractor assistance to be used.
