Abstract: ALS is a disease of high priority to the Department of Veterans Affairs because of ongoing concerns about the health of veterans who served in the Gulf War. The creation of the registry will have significance both for VA and for the larger U.S. society in understanding the natural history of ALS. It will provide VA with crucial epidemiological data on the current population of veterans with ALS, as well as the ongoing identification of new cases. The data will help VA to understand how veterans are affected by ALS and may assist with early identification of new ALS clusters. This registry will provide a mechanism for informing veterans with ALS of new clinical drug trials and other studies.

Affected Public: Individuals or households.

Estimated Annual Burden: 882. Estimated Average Burden per Respondent: 29 minutes.

Frequency of Response: Semiannually.

Estimated Number of Respondents: 1,808.
