SUPPLEMENTARY INFORMATION: The FERC-715 ("Annual Transmission Planning and Evaluation Report," OMB Control No. 1902-0171) is a mandatory filing described at 18 CFR 141.300. The FERC-715 must be submitted by each transmitting utility that operates integrated (that is, non-radial) transmission facilities at or above 100 kilovolts. [An overview and instructions for filing the FERC-715 are posted on the FERC Web site at: <http://www.ferc.gov/docs-filing/eforms/form-715/instructions.asp>.]

Section 213 (b) of the Federal Power Act (FPA), as amended by the Energy Policy Act of 1992, requires FERC to collect, annually from transmitting utilities, sufficient information about their transmission systems to inform potential transmission customers, state regulatory authorities, and the public, of available transmission capacity and constraints. FERC-715 also supports the Commission's expanded responsibilities under Sections 211, 212, 213(a), 304, 307(a), 309, and 311 of the FPA, as amended, for reviewing reliability issues, market structure relationships, and in rate and other regulatory proceedings.

Action: The Commission is requesting a three-year extension of the current reporting requirements, with no change.

Burden Statement: Public reporting burden for this collection is estimated as follows.

FERC data collection	Number of respondents annually	Number of responses per respondent	Average burden hours per response	Total annual burden hours
	(1)	(2)	(3)	(1) × (2) × (3)
FERC-715	183	1	160	29,280

Note: These figures may not be exact, due to rounding.

The total estimated annual cost burden¹ to respondents is \$1,806,026.90 $\{[(29,280 \text{ hrs.}) / (2,080 \text{ hrs./yr.})] \times (\$128,297 \text{ per yr.})\}$.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or

overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submission of responses.

Secretary.

¹During its history, "FERC-912" has been known by various 'names' and OMB control numbers. Originally, FERC had wanted to include FERC-912 requirements in the FERC-556 'umbrella' of requirements. Because FERC-556 ("Cogeneration and Small Power Production;" OMB Control No. 1902-0075) was pending OMB review of another rulemaking (in Docket No. RM05-36-000) prior to the issuance of the Notice of Proposed Rulemaking (NOPR) in RM06-10, the Commission used a temporary identifier of "FERC-912".

"FERC-912" was originally assigned the OMB Control No. 1902-0219 at the NOPR stage. However, prior to issuance of the final rule in Docket RM06-10, OMB Control No. 1902-0219 was eliminated from OMB's inventory.

FERC-556 (OMB Control No. 1902-0075) was then approved in RM05-36, so FERC used the "FERC-912(556)" identifier in the Final Rule in RM06-10. The Commission planned to transfer the hours associated with "FERC-912(556)" in RM06-

10 to FERC-556. Page two of the OMB approval (dated 2/23/2007) for ICR Reference Number 200611-1902-003 listed OMB Control No. 1902-0237 as FERC-556.

Currently FERC-556 (OMB Control No. 1902-0075) is pending OMB review, so this collection is being called "FERC-912" and is being submitted separately. FERC-556 is not a subject of this Notice.
