

In 1967, human remains representing a minimum of two individuals were removed from Strato's Grove site (also known as Strato's Grave site), Onondaga County, NY, during excavations by James Tuck. Tuck published results from the excavation in his book, *Onondaga Iroquois Prehistory* (Tuck 1971). The 19 associated funerary objects are 1 lot of bird bone tube beads; 1 lot of copper fragments, shell, and wood; 1 gun flint; 1 spent lead shot; 1 lot of charcoal; 1 copper pan; 2 copper hawk bells; 1 lot of wood; 1 lot of copper; 1 lot of wooden "cradle board fragments"; 1 animal bone bead; 1 iron cutlery knife; 1 string with copper; 1 lot of raspberry seeds; 1 iron; 1 nail; 1 lot of "kettle contents"; and 1 lot of iron and copper fragments (surface finds).

In 2002, an examination of the collections found two finger bones in a bag labeled "metal ring." The human remains were determined to be from a historic period Onondaga burial site. These human remains represent small fragments and do not correspond with the specific burials discussed in James Tuck's book (1971:190). The human remains and associated funerary objects are determined to be affiliated with the present-day descendants of the Onondaga represented by the Onondaga Nation of New York.

Officials of Syracuse University have determined that, pursuant to 25 U.S.C. 3001 (9–10), the human remains described above represent the physical remains of two individuals of Native American ancestry. Officials of Syracuse University also have determined that, pursuant to 25 U.S.C. 3001 (2), the 19 objects and lots of objects described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of Syracuse University have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and the Onondaga Nation of New York.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains should contact Douglas Armstrong, Archaeological Collections Facility, Anthropology Department, 209 Maxwell Hall, Syracuse University, Syracuse, NY 13244, telephone (315) 443–2405, before October 22, 2009. Repatriation of the human remains to the Onondaga Nation of New York may proceed after that date if no additional claimants come forward.

The Syracuse University is responsible for notifying the Onondaga Nation of New York that this notice has been published.

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: Warren Anatomical Museum, Harvard University, Boston, MA

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains in the possession and control of the Warren Anatomical Museum, Harvard University, Boston, MA. The human remains were removed from an unknown location.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

A detailed assessment of the human remains was made by Peabody Museum of Archaeology and Ethnology and Warren Anatomical Museum professional staff in consultation with representatives of the Cayuga Nation of New York; Oneida Nation of New York; Oneida Tribe of Indians of Wisconsin; Onondaga Nation of New York; Seneca Nation of New York; Seneca-Cayuga Tribe of Oklahoma; Saint Regis Mohawk Tribe, New York; Tonawanda Band of Seneca Indians of New York; and Tuscarora Nation of New York.

On an unknown date, human remains representing a minimum of one individual were removed from an unknown location. In 1847, the human remains were removed from a public institution in the Boston area by John Collins Warren, MD, and donated to the Warren Anatomical Museum that same year. No known individual was identified. No associated funerary objects are present.

Museum documentation identifies the individual as "an Indian, one of the Six

Nations," suggesting that this individual is Iroquois. Osteological information suggests that this individual most likely dates from the Protohistoric to early Historic Periods. Based on museum records and osteological information, the human remains are determined to be Native American, and most likely removed from an area that was inhabited by at least one of the tribes of the Iroquois. The preponderance of evidence supports the cultural affiliation to Iroquois people, which are represented by the Cayuga Nation of New York; Oneida Nation of New York; Oneida Tribe of Indians of Wisconsin; Onondaga Nation of New York; Seneca Nation of New York; Seneca-Cayuga Tribe of Oklahoma; Saint Regis Mohawk Tribe, New York; Tonawanda Band of Seneca Indians of New York; and Tuscarora Nation of New York.

Officials of the Peabody Museum of Archaeology and Ethnology and Warren Anatomical Museum have determined that, pursuant to 25 U.S.C. 3001 (9–10), the human remains described above represent the physical remains of one individual of Native American ancestry. Officials of the Peabody Museum of Archaeology and Ethnology and Warren Anatomical Museum also have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and the Cayuga Nation of New York; Oneida Nation of New York; Oneida Tribe of Indians of Wisconsin; Onondaga Nation of New York; Seneca Nation of New York; Seneca-Cayuga Tribe of Oklahoma; Saint Regis Mohawk Tribe, New York; Tonawanda Band of Seneca Indians of New York; and Tuscarora Nation of New York.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains should contact Patricia Capone, Repatriation Coordinator, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Ave., Cambridge, MA 02138, telephone: (617) 496–2047, before October 22, 2009. Repatriation of the human remains to the Cayuga Nation of New York; Oneida Nation of New York; Oneida Tribe of Indians of Wisconsin; Onondaga Nation of New York; Seneca Nation of New York; Seneca-Cayuga Tribe of Oklahoma; Saint Regis Mohawk Tribe, New York; Tonawanda Band of Seneca Indians of New York; and Tuscarora Nation of New York may proceed after that date if no additional claimants come forward.

The Peabody Museum of Archaeology and Ethnology, Harvard University is

responsible for notifying the Cayuga Nation of New York; Oneida Nation of New York; Seneca Tribe of Indians of Wisconsin; Onondaga Nation of New York; Seneca Nation of New York; Seneca-Cayuga Tribe of Oklahoma; Saint Regis Mohawk Tribe, New York; Tonawanda Band of Seneca Indians of New York; and Tuscarora Nation of New York that this notice has been published.

Dated: September 1, 2009.

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: New York University College of Dentistry, New York, NY

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains in the possession of the New York University College of Dentistry, New York, NY. The human remains were removed from the Ely Site, Monroe County, NY.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

A detailed assessment of the human remains was made by New York University College of Dentistry professional staff in consultation with representatives of the Seneca Nation of New York, Seneca-Cayuga Tribe of Oklahoma, and Tonawanda Band of Seneca Indians of New York.

Around 1940, human remains representing a minimum of one individual were removed from the Burgett or Ely Site (RMSC HNE 124), Monroe County, NY, by Robert Hill. In 1941, the remains were accessioned by the Department of Physical Anthropology at the Museum of the American Indian, Heye Foundation. In 1956, the remains were transferred to Dr. Theodore Kazamiroff, New York University College of Dentistry. No

known individual was identified. No associated funerary objects are present.

Museum of the American Indian records list the locality of origin of the human remains as the "Burgett Site, West Rush, N.Y." Labels with the remains repeat this information and specify that they were removed from burial 12 or 13. Cranial morphology and tooth shape is consistent with an individual of Native American ancestry. New York State Historic Preservation Office site files identify the Burgett site as the Ely Site, RMSC HNE 124. Archeologists have interpreted the Ely Site as a protohistoric Seneca site based on the ceramic types, pipe styles, lithics, and European materials present at the site and found in association with the burials. Consultations with the Seneca Nation of New York, Seneca-Cayuga Tribe of Oklahoma, and Tonawanda Band of Seneca Indians of New York confirm the identification of the Ely Site as a Seneca site.

After European contact, the Seneca were divided geopolitically into two groups, the Eastern Seneca and the Western Seneca. The Eastern Seneca remained in New York, while the Western Seneca moved to Ohio and then Oklahoma. The Eastern Seneca are represented today by two Federally-recognized tribes, the Seneca Nation of New York and Tonawanda Band of Seneca of New York. The Western Seneca are represented by the Seneca-Cayuga Tribe of Oklahoma.

Officials of New York University College of Dentistry have determined that, pursuant to 25 U.S.C. 3001 (9-10), the human remains described above represent the physical remains of one individual of Native American ancestry. Officials of New York University College of Dentistry also have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and the Seneca Nation of New York, Seneca-Cayuga Tribe of Oklahoma, and Tonawanda Band of Seneca Indians of New York.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains should contact Dr. Louis Terracio, New York University College of Dentistry, 345 East 24th St., New York, NY 10010, telephone (212) 998-9917, before October 22, 2009. Repatriation of the human remains to the Seneca Nation of New York, Seneca-Cayuga Tribe of Oklahoma, and Tonawanda Band of Seneca Indians of New York may proceed after that date if no additional claimants come forward.

The New York University College of Dentistry is responsible for notifying the Seneca Nation of New York, Seneca-Cayuga Tribe of Oklahoma, and Tonawanda Band of Seneca Indians of New York that this notice has been published.

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: Warren Anatomical Museum, Harvard University, Boston, MA

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains in the possession and control of the Warren Anatomical Museum, Harvard University, Boston, MA. The human remains were removed from Martha's Vineyard, Dukes County, MA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

A detailed assessment of the human remains was made by Peabody Museum of Archaeology and Ethnology and Warren Anatomical Museum professional staff in consultation with representatives of the Mashpee Wampanoag Tribe, Massachusetts; Wampanoag Tribe of Gay Head (Aquinnah) of Massachusetts; and Assonet Band of the Wampanoag Nation, a non-Federally recognized Indian group.

At an unknown date before 1870, human remains representing a minimum of one individual were removed probably from Martha's Vineyard, Dukes County, MA, by an unknown individual. The human remains were donated to the Warren Anatomical Museum on an unknown date before 1870, and are part of the J. Mason Warren Collection. Specimen labels describe the individual as being from "Martha's Vineyard" and "From
