

Standards (CFATS), 6 CFR part 27, are the Department's regulations under Section 550 governing security at high-risk chemical facilities. CFATS represents a national-level effort to minimize terrorism risk to such facilities. Its design and implementation balance maintaining economic vitality with securing facilities and their surrounding communities. In collaboration with the private sector and other stakeholders, the regulations were designed to take advantage of protective measures already in place and to allow facilities to employ a wide range of tailored measures to satisfy the regulations' Risk-Based Performance Standards (RBPS). The instruments within this collection will be used to manage the CFATS program.

Solicitation of Comments

No comments were received in response to the 60-day public comment period. However, the department has adjusted the cost estimates based on improved cost information.

The Office of Management and Budget is particularly interested in comments which

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
