SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to request a three year extension of a currently approved collection of the Form C-404, Building Permits Survey. The Census Bureau produces statistics used to monitor activity in the large and dynamic construction industry. Given the importance of this industry, several of the statistical series are key economic indicators. Two such series are (a) Housing Units Authorized by Building Permits and (b) Housing Starts. Both are based on data from samples of permit-issuing places. These statistics help State and local governments and the Federal Government, as well as private industry, to analyze this important sector of the economy.

The Census Bureau uses Form C-404 to collect data to provide estimates of the number and valuation of new residential housing units authorized by building permits. The current form is titled "Report of New Privately-Owned Residential Building or Zoning Permits Issued". We plan to change the title to "Report of Building or Zoning Permits Issued for New Privately-Owned Housing Units" to clarify the data being requested. We use the data, a component of the index of leading economic indicators, to estimate the number of housing units started, completed, and sold, if single-family, and to select samples for the Census Bureau's demographic surveys. The Census Bureau also uses the detailed geographic data collected from State and local officials on new residential construction authorized by building permits in the development of annual population estimates which are used by government agencies to allocate funding and other resources to local areas. Policymakers, planners, businessmen/
