SUPPLEMENTARY INFORMATION:

I. Background

Section 115 (e) of the Federal Mine Safety and Health Act of 1977 (Mine Act) required the Secretary of Labor (Secretary) to publish proposed regulations which provide that mine rescue teams be available for rescue and recovery work to each underground mine in the event of an emergency. In addition, the costs of making advance arrangements for such teams are to be borne by the operator of each such mine.

Congress considered the ready availability of mine rescue in the event of an accident to be vital protection for miners. Congress was concerned that too often in the past, rescue efforts at a disaster site have had to await the delayed arrival of skilled mine rescue teams. In responding to Congressional concerns, the Mine Safety and Health Administration (MSHA) promulgated 30 CFR Part 49, Mine Rescue Teams. The regulations set standards related to the availability of mine rescue teams; alternate mine rescue capability for small and remote mines and mines with special mining conditions; inspection and maintenance records of mine rescue equipment and apparatus; physical requirements for mine rescue team members and alternates; and experience and training requirements for team members and alternates.

II. Desired Focus of Comments

MSHA is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
