

5.0 Environmental Consideration

The amendment[s] change[s] a requirement with respect to the installation or use of a facility component located within the restricted area as defined in 10 CFR part 20 or surveillance requirements. The NRC staff has determined that the amendment involves no significant increase in the amounts, and no significant change in the types, of any effluents that may be released offsite, and that there is no significant increase in individual or cumulative occupational radiation exposure. The Commission has previously issued a proposed finding that the amendment involves no significant hazards consideration and there has been no public comment on such finding published [DATE] ([] FR []). Accordingly, the amendment meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the issuance of the amendment.

6.0 Conclusion

The NRC staff has concluded, based on the considerations discussed above, that: (1) There is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner; (2) such activities will be conducted in compliance with the Commission's regulations; and (3) the issuance of the amendments will not be inimical to the common defense and security or to the health and safety of the public.

Proposed Model No Significant Hazards Consideration Determination for Plant-Specific Adoption of TSTF Traveler-508, Revision 1, "Revise Control Room Habitability Actions To Address Lessons Learned From TSTF-448 Implementation"

Description of Amendment Request: [Plant name] requests adoption of an approved change to the standard technical specifications (STS), as amended by Technical Specification Task Force (TSTF) Standard Technical Specification Change Traveler-448, Revision 3, "Control Room Habitability" and TSTF Traveler-508, Revision 1, "Revise Control Room Habitability Actions to Address Lessons Learned from TSTF-448 Implementation." TSTF Traveler-508, Revision 1, revised the STS, as previously amended by TSTF Traveler-448, Revision 3, to address inconsistencies with TSTF Traveler-448, Revision 3. The licensee's proposed changes are consistent with NRC-approved TSTF Traveler-508, Revision 1.

Basis for proposed no significant hazards consideration determination: As required by Title 10 of the *Code of Federal Regulations* (10 CFR) Section 50.91(a), the [LICENSEE] analysis of the issue of no significant hazards consideration is presented below:

Criterion 1: Does the Proposed Change Involve a Significant Increase in the Probability or Consequences of an Accident Previously Evaluated?

Response: No.

The proposed changes do not adversely affect accident initiators or precursors nor alter the design assumptions, conditions, or configuration of the facility. The proposed changes do not alter or prevent the ability of structures, systems, and components (SSCs) to perform their intended function to mitigate the consequences of an initiating event within the assumed acceptance limits. This is a revision to the TSs for the control room ventilation system, which is a mitigation system designed to minimize unfiltered air leakage into the control room envelope (CRE) and to filter the CRE atmosphere to protect the CRE occupants following accidents previously analyzed. An important part of the system is the CRE boundary. Under the proposed change, the movement of irradiated fuel and operations with the potential to drain the reactor vessel may be resumed following confirmation that the CRE occupants will be protected in the event of a DBA. This ensures that the consequences of an accident previously evaluation are not significantly increased. The CRE ventilation system is not an initiator or precursor to any accident previously evaluated. Therefore, the probability of any accident previously evaluated is not increased. The consequences of an accident during the proposed Actions are not significantly increased as the Actions require verification that the CRE occupants

are protected by the required mitigating actions.

Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

Criterion 2: Does the Proposed Change Create the Possibility of a New or Different Kind of Accident from any Previously Evaluated?

Response: No.

This revision will not impact the accident analysis. The changes will not alter the requirements of the CRE ventilation system or its function during accident conditions. No new or different accidents result from performing the new surveillance or following the new program. The changes do not involve a physical alteration of the plant (*i.e.*, no new or different type of equipment will be installed) or a significant change in the methods governing normal plant operation. The changes do not alter assumptions made in the safety analysis. The proposed changes are consistent with the safety analysis assumptions and current plant operating practice.

Therefore, the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Criterion 3: Does the Proposed Change Involve a Significant Reduction in the Margin of Safety?

Response: No.

The proposed changes do not alter the manner in which safety limits, limiting safety system settings or limiting conditions for operation are determined. The safety analysis acceptance criteria are not affected by these changes. The proposed changes will not result in plant operation in a configuration outside the design basis. Compensatory measures are required to be established in order to maintain plant operation in a configuration that is within the design basis. The proposed changes do not adversely affect systems that respond to safely shutdown the plant and to maintain the plant in a safe shutdown condition.

Therefore, the proposed amendment would not involve a significant reduction in a margin of safety.

Based on the NRC staff's review of the licensee's analysis, the NRC staff concludes that the proposed amendment presents no significant hazards consideration under the standards set forth in 10 CFR 50.92(c) and, accordingly, a finding of "no significant hazards consideration" is justified.

OFFICE OF PERSONNEL MANAGEMENT

[(OMB Control No. 3206-0138; Form RI 30-9)]

Submission for OMB Review; Comment Request for Review of a Revised Information Collection

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, May 22, 1995), this notice announces that the Office of Personnel Management (OPM) has submitted to the Office of Management and Budget (OMB) a request for review of a revised information collection, "Reinstatement of Disability Annuity Previously Terminated Because of Restoration to Earning Capacity" (OMB Control No. 3206-0138; Form RI 30-9), informs former disability annuitants of their right to request restoration under title 5, U.S.C. Sections 8337 and 8455. It also specifies the conditions to be met and the documentation required for a person to request reinstatement.

We estimate 200 forms are completed annually. The form takes approximately 60 minutes to respond, including a medical examination. The annual estimated burden is 200 hours. Burden may vary depending on the time required for a medical examination.

For copies of this proposal, contact Cyrus S. Benson on (202) 606-4808, FAX (202) 606-0910 or via E-mail to Cyrus.Benson@opm.gov. Please include a mailing address with your request.

DATES: Comments on this proposal should be received within 30 calendar days from the date of this publication.

ADDRESSES: Send or deliver comments to—

James K. Freiert, Deputy Assistant Director, Retirement Services Program, Center for Retirement and Insurance Services, U.S. Office of Personnel Management, 1900 E Street, NW., Room 3305, Washington, DC 20415-3500; and

OMB Desk Officer, Office of Information & Regulatory Affairs, Office of Management and Budget, New Executive Office Building, NW., 725 17th Street, NW., Room 10235, Washington, DC 20503.

For information regarding administrative coordination contact: Cyrus S. Benson, Team Leader, Publications Team, RIS Support Services/Support Group, U.S. Office of Personnel Management, 1900 E Street, NW., Room 4H28, Washington, DC 20415, (202) 606-0623.

Office of Personnel Management.

John Berry,

Director.

[OMB Control No. 3206-0042; RI 25-15]

Submission for OMB Review; Request for Review of a Revised Information Collection

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, May 22, 1995 and 5 CFR 1320), this notice announces that the Office of Personnel Management (OPM) has submitted to the Office of Management and Budget (OMB) a request for review of a revised information collection, "Notice of Change in Student's Status" (OMB Control No. 3206-0042; Form RI 25-15), is used to collect sufficient information from adult children of deceased Federal employees or annuitants to assure that the child continues to be eligible for payments from OPM.

We estimate 2,500 certifications are processed annually. Each form takes approximately 20 minutes to complete. The annual estimated burden is 835 hours.

For copies of this proposal, contact Cyrus S. Benson by telephone (202) 606-4808, FAX (202) 606-0910 or by e-mail to Cyrus.Benson@opm.gov. Please include a mailing address with your request.
