*Title:* National Youth in Transition Database and Youth Outcome Survey. *OMB No.:* 0970–0340. *Description:* The Foster Care

Independence Act of 1999 (42 U.S.C.

1305 *et seq.*) as amended by Public Law 106–169 requires State child welfare agencies to collect and report to the Administration on Children and Families (ACF) data on the characteristics of youth receiving independent living services and information regarding their outcomes. The regulation implementing the National Youth in Transition Database, listed in 45 CFR 1356.80, contains standard data collection and reporting requirements for States to meet the law's requirements. ACF will use the information collected under the regulation to track independent living services, assess the collective outcomes of youth, and potentially to evaluate State performance with regard to those outcomes consistent with the law's mandate.

*Respondents:* State agencies that administer the John H. Chafee Foster Care Independence Program.

# **Proposed Project**

The Epidemiology and Impact of Workplace Violence in Pennsylvania Teachers and Paraprofessionals— NEW—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

# Background and Brief Description

Workplace violence (WPV) is a significant concern for employers and employees alike; every year in the U.S., WPV results in hundreds of deaths, nearly two million nonfatal injuries, and billions of dollars in costs. Historically, the education field has not been the focus of WPV research; however, the classroom is a workplace too. From 1999 to 2003, teachers were the victims of approximately 183,000 nonfatal crimes including 119,000 thefts and 65,000 violent crimes such as rape and assault.

Workplace violence is not limited to physical attacks; verbal threats, bullying, and harassment also produce psychological harm to teachers and school staff. A newer form of such violence is that of electronic aggression. The CDC defines the problem as: "Any type of harassment or bullying (teasing, telling lies, making fun of someone, making rude or mean comments, spreading rumors, or making threatening or aggressive comments) that occurs through e-mail, a chat room, instant messaging, a Web site (including blogs) or text messaging." While a recent study found that 35% of young people had been the victims of electronic aggression, the impact of this in the workplace is relatively unknown. The extant evidence indicates that working in a school environment carries an excess risk for becoming a victim of some form of WPV; however, little is known about the incidence or risk factors for such.

The Occupational Safety and Health Act, Public Law 91–596 (section 20[a][1]) authorizes the National Institute for Occupational Safety and Health (NIOSH) to conduct research to advance the health and safety of workers. NIOSH is conducting a population-based, cross-sectional survey among teachers and paraprofessionals in the State of Pennsylvania. The goals of this study are (1) Estimate the number and prevalence proportions (rates) of physical, non-physical, and electronic WPV in teachers and paraprofessionals in Pennsylvania; (2) Identify the circumstances and most common risk
