

assessment body, and a firewalled conformity assessment body) if:

- At the time of product testing, the product was tested by a third party conformity assessment body that was ISO/IEC 17025 accredited by an ILAC-MRA member at the time of the test. For firewalled conformity assessment bodies, the firewalled conformity assessment body must be one that the Commission has accredited by order at or before the time the product was tested, even if the order did not include the test methods specified in this notice. If the third party conformity assessment body has not been accredited by a Commission order as a firewalled conformity assessment body, the Commission will not accept a certificate of compliance based on testing performed by the third party conformity assessment body before it is accredited, by Commission order, as a firewalled conformity assessment body.

- The third party conformity assessment body's application for testing for total lead content in children's products using the test methods identified in this document is accepted by the CPSC by December 31, 2009 or 30 days prior to the date the Commission terminates the stay of enforcement that was originally announced in the **Federal Register** on February 9, 2009 (74 FR 6396) (whichever is the later date);

- The product was tested on or after December 4, 2008 with respect to CPSC test method CPSC-CH-E1001-08, *Standard Operating Procedure for Determining Total Lead (Pb) in Children's Metal Products (Including Children's Metal Jewelry)* and/or was tested on or after February 1, 2009 with respect to CPSC test method CPSC-CH-E1002-08, *Standard Operating Procedure for Determining Total Lead (Pb) in Non-Metal Children's Products*. For example, a children's product constructed completely from metal materials must be tested in accordance with CPSC-CH-E1001-08. A children's product constructed completely from non-metal materials must be tested in accordance with CPSC-CH-E1002-08. A children's product constructed from a combination of metal and non-metal materials must be tested in accordance with both test methods.

- The accreditation scope in effect for the third party conformity assessment body at that time expressly included testing to the test method(s) identified earlier in part I of this document;

- The test results show compliance with the applicable *current* standards and regulations (*i.e.*, the total lead limits in effect on the day the certification is presented, rather than those in effect on

the day that the testing was performed); and

- The third party conformity assessment body's accreditation and inclusion of the test method(s) for determining total lead content (identified earlier in part I of this document) in its scope remain in effect through the effective date for mandatory third party testing and manufacturer/private labeler certification for the total lead limit requirements for children's products.
