

### Conclusion

The NRC staff has concluded that the proposed action is consistent with the NRC's unrestricted release criteria specified in 10 CFR 20.1402. Because the proposed action will not significantly impact the quality of the human environment, the NRC staff concludes that the proposed action is the preferred alternative.

### Agencies and Persons Consulted

NRC provided a draft of this Environmental Assessment to the Maryland Department of the Environment for review on August 7, 2009. On September 28, 2009, the Maryland Department of the Environment responded by electronic mail. The State agreed with the conclusions of the EA, and otherwise had no comments.

The NRC staff has determined that the proposed action is of a procedural nature, and will not affect listed species or critical habitat. Therefore, no further consultation is required under Section 7 of the Endangered Species Act. The NRC staff has also determined that the proposed action is not the type of activity that has the potential to cause effects on historic properties. Therefore, no further consultation is required under Section 106 of the National Historic Preservation Act.

### III. Finding of No Significant Impact

The NRC staff has prepared this EA in support of the proposed action. On the basis of this EA, the NRC finds that there are no significant environmental impacts from the proposed action, and that preparation of an environmental impact statement is not warranted. Accordingly, the NRC has determined that a Finding of No Significant Impact is appropriate.

Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC or the Commission) has issued Renewed Facility Operating License No. DPR-50 to Exelon Generation Company, LLC, (licensee), the operator of the Three Mile Island Nuclear Station, Unit 1, (TMI-1). Renewed Facility Operating License No. DPR-50 authorizes operation of TMI-1 by the licensee at reactor core power levels not in excess of 2568 megawatts thermal (852 megawatts electric), in accordance with the provisions of the TMI-1 renewed license and its technical specifications. The notice also serves as the record of decision for the renewal of Facility Operating License No. DPR-50, consistent with Title 10 of the *Code of Federal Regulations* (10 CFR) Section 51.103, "Record of Decision—General." As discussed in the final Supplemental

Environmental Impact Statement for TMI-1 (NUREG-1437, Generic Environmental Impact Statement for License Renewal of Nuclear Plants, Supplement 37, Regarding Three Mile Island Nuclear Station, Unit 1," issued June 2009), the Commission has considered a range of reasonable alternatives that included fossil fuel generation, renewable energy sources, and demand-side measures such as energy conservation. The factors considered in the record of decision appear in Supplement 37.

TMI-1 is a pressurized water reactor located 10 miles southeast of Harrisburg, Pennsylvania. The application for the renewed license complied with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. As required by the Act and the Commission's regulations in 10 CFR Chapter 1, the Commission has made appropriate findings, which are set forth in the license.
