information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by this ICR include individuals or entities engaged in activities related to the registration of a pesticide product, which may be identified by the North American Industrial Classification System (NAICS) code 325320.

Estimated Number of Respondents: 103.

Frequency of Response: As needed. Estimated Total Annual Hour Burden: 178,285.

Estimated Total Annual Cost: \$14,103,722. This ICR does not involve any capital investment or maintenance and operational costs.

Changes in the Estimates: There is a net decrease of 80,615 hours in the total estimated burden currently identified in

the OMB Inventory of Approved ICR Burdens. EPA anticipates that 47 fewer tolerance petitions will be received annually compared to the previous three years (2006, 2007, and 2008). This would result in a corresponding 81,122 hour reduction in estimated annual burden. The change is an adjustment. In addition, EPA estimates that IR-4 petitioners are changing the way in which they compile tolerance petitions for submission to EPA in an effort to capture the new fee waiver incentives under the Pesticide Registration Improvement Renewal Act. This change in IR-4 petition preparation results in an additional 13 hours per response, resulting in a program change increase of 507 hours annually.
