[Project No. 13525-000]

**Green Hydropower Inc.; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications**

October 30, 2009.

On June 23, 2009, and supplemented on October 15, 2009, Green Hydropower Inc. filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA)<sup>1</sup> to study the feasibility of the proposed Green Hydropower Chief Joseph Project. The project would be located in Douglas and Okanogan Counties, Washington. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Green Hydropower Chief Joseph Project is an in-river development that would be located approximately 1 mile downstream of the U.S. Army Corps of Engineers' Chief Joseph Dam on the Columbia River. The project would consist of: (1) Multiple 10-foot-diameter to 40-foot diameter sea anchors (pieces of high-strength synthetic material that inflate to roughly the shape of a parachute in the presence of an underwater current); (2) up to 1.25-mile long synthetic rope; (3) an electric driven traction winch or an electric-driven capstan; (4) a 1 to 2-megawatt generator attached to the winch or capstan; (5) a floating vessel, such as a boat; (6) a new approximately 480-volt, 1,500-foot-long transmission line; and (7) appurtenant facilities. The sea anchors would be attached to a rope that is connected to the winch or capstan. The winch or capstan would be mounted on shore or on a floating vessel. The sea anchors would be pulled downstream by the existing current, pulling the rope through a winch or capstan, which will turn the generator. The project would have an estimated annual generation of between 8,750 megawatt-hours (MWh) and 17,500 MWh per year.

**What Information Is EPA Particularly Interested in?**

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) Enhance the quality, utility, and clarity of the information to be collected; and
- (iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In

particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

**What Should I Consider When I Prepare My Comments for EPA?**

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under DATES.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

**What Information Collection Activity or ICR Does This Apply to?**

*Affected entities:* Entities potentially affected by this action are sample collectors.

*Title:* RadNet.

*ICR numbers:* EPA ICR No. 0877.10, OMB Control No. 2060-0015.

*ICR status:* This ICR is currently scheduled to expire on May 31, 2010. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

*Abstract:* RadNet is a national network of stations collecting sampling media that include air, precipitation, drinking water, and milk. Samples are sent to EPA National Air and Radiation Environmental Laboratory (NAREL) in Montgomery, Alabama, where they are analyzed for radioactivity. RadNet

provides emergency response/homeland security and ambient monitoring information on levels of environmental radiation across the nation. All stations, usually operated by state and local personnel, participate in RadNet voluntarily. Station operators complete information forms that accompany the samples. The forms request descriptive information pertaining to sample location, e.g., sample type, sample location, length of sampling period, and volume represented.

*Burden Statement:* The annual public reporting and recordkeeping burden for this collection of information is estimated to average 1.3 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

*Estimated total number of potential respondents:* 249.

*Frequency of response:* from twice weekly to four times annually, depending upon type of medium being sampled.

*Estimated total average number of responses for each respondent:* 34.

*Estimated total annual burden hours:* 8363 hours.

*Estimated total annual costs:* \$254,890. This cost refers to respondent burden. The costs of capital investment, maintenance and operational costs are assumed by the Agency.

**Are There Changes in the Estimates From the Last Approval?**

There will be an increase in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects EPA's decision to upgrade and expand the air monitoring network of RadNet. Over the years covered by this ICR renewal the air network will expand from existing 64 monitors to

approximately 130 monitors, which will result in the addition of 66 respondents.

### What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another Federal Register notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
