

Tobacco Control Act, every person who owns or operates any domestic establishments engaged in the manufacture, preparation, compounding, or processing of a regulated tobacco product must register with FDA by December 31 of each year. Moreover, all registrants must at the time of registration file with FDA a list of all tobacco products which are being manufactured, prepared, compounded, or processed by that person for commercial distribution, along with certain accompanying information, including all labeling (see section 905(i)(1) of the act, as added by the Tobacco Control Act).

FDA does not intend to enforce the requirement to submit registration and product listing information under section 905 of the act by December 31, 2009, provided that the submission is received by FDA on or before February 28, 2010. We recognize that the forms developed by FDA are new to industry, and so may require additional time to complete accurately. While electronic submission of registration and listing information is not required, FDA is strongly encouraging electronic submission to facilitate efficiency and timeliness of data management and submission. FDA does recognize, however, that electronic submission requires several additional steps, such as obtaining an Electronic Submissions Gateway account and becoming familiar with the eSubmitter electronic application. FDA therefore believes that this additional time for the first submission of this registration and listing information should result in submission of higher quality information.

II. Significance of Guidance

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the agency's current thinking on "Registration and Product Listing for Owners and Operators of Domestic Tobacco Product Establishments." It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statute and regulations.
