Background

Section 9 of the ESA prohibits the "take" of wildlife species listed as endangered or threatened by either the FWS or NMFS (16 USC 1538). The ESA defines the term "take" as to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect listed species, or attempt to engage in such conduct.

"Harm" is defined to include significant habitat modification or degradation where it actually kills or injures wildlife by significantly impairing essential behavioral patterns, including breeding, feeding, spawning, migrating, rearing, and sheltering (64 FR 60727). Pursuant to section 10(a)(1)(B) of the ESA, FWS and NMFS may issue ITPs authorizing the take of listed species if, among other things, such taking is incidental to, and not the purpose of, otherwise lawful activities.

Take of listed plant species is not prohibited under the ESA, and cannot be authorized under a section 10 permit. However, the applicant proposes to include Yreka phlox (*Phlox hirsuta*) in the HCP to extend the plan's conservation benefits to this species. The applicant would receive assurances under the "No Surprises" regulations found in 50 CFR 17.22(b)(5), 17.32(b)(5), and 222.307(g) for all proposed covered species in the ITP.

To receive an ITP under the ESA, an applicant must prepare an HCP that specifies the following: (1) the impact of the taking; (2) steps the applicant will take to minimize and mitigate the impact; (3) funding available to implement the steps; (4) what
