

risks of concern for nontarget aquatic organisms, the Agency is requiring that treated canal water either be used to irrigate crops or be held for 96 hours prior to release into receiving water bodies. In addition, as there are currently a limited number of aquatic herbicides registered for use in irrigation canals, the Agency has determined that xylene may continue to be used within all states identified under the Bureau of Reclamation Act, provided that the appropriate state registrations are also in place.

**SUPPLEMENTARY INFORMATION:**

OMB Control No: 3060-XXXX.

Title: Sections 1.49 and 1.54,

Forbearance Petition Filing Requirements.

Form No.: N/A.

Type of Review: New collection.

Respondents: Business or other for-profit.

Number of Respondents: 10 respondents; 10 responses.

Estimated Time Per Response: 640 hours.

Frequency of Response: On occasion reporting requirement, recordkeeping requirement and third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. Sections 151, 154(i), 154(j), 155(c), 160, 201 and 303(r).

Total Annual Burden: 6,400 hours.

Total Annual Cost: N/A.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality:

The Commission is not requesting that the respondents submit confidential information to the Commission. Respondents may, however, request confidential treatment for information they believe to be confidential under 47 CFR 0.459 of the Commission's rules.

Need and Uses: The Commission is requesting OMB approval of this new information collection request in order to obtain the full three year clearance from them. The Commission is estimating 6,400 total annual burden hours.

Under section 10 of the Communications Act of 1934, as amended, telecommunications carriers may petition the Commission to forbear from applying to a telecommunications carrier any statutory provision or Commission regulation. When a carrier petitions the Commission for forbearance, section 10 requires the Commission to make three determinations with regard to the need for the challenged provision or regulation. If the Commission fails to act within one year (extended by three additional months, if necessary) the petition is "deemed granted" by operation of law. These determinations require complex, fact-intensive analysis, e.g., "whether forbearance from enforcing the provision or regulation will promote competitive market conditions."

Under the new filing procedures, the Commission requires that petitions for forbearance must be "complete as filed" and explain in detail what must be included in the forbearance petition. The Commission also incorporates by reference its rule, 47 CFR 1.49, which states the Commission's standard "specifications as to pleadings and documents." Precise filing requirements are necessary because of section 10's strict time limit for Commission action. Also, commenters must be able to understand clearly the scope of the petition in order to comment on it. Finally, standard filing procedures inform petitioners precisely what the Commission expects from them in order to make the statutory determinations that the statute requires.

**SUPPLEMENTARY INFORMATION:** By this Public Notice, DA 09-2397, released November 6, 2009, the Public Safety and Homeland Security Bureau (Bureau) seeks to refresh the record in the above-referenced docket addressing location accuracy standards for wireless E911 calls. In light of the passage of time since the most recent activity in this docket, we seek comment on whether subsequent developments in the industry and technology may have affected parties' positions on the issues raised.

Recent developments in this proceeding include the vacatur and remand of the Commission's 2007 Report and Order in this proceeding, the submission by the Association of Public Safety Communications Officials-International (APCO), the National Emergency Number Association (NENA), Verizon Wireless, Sprint Nextel Corporation, and AT&T of written ex parte letters recommending new E911 accuracy requirements for both handset-based and network-based technologies in order to achieve E911

accuracy compliance at the county-level, the Bureau's September 2008 Public Notice seeking comment on these proposals, as well as the subsequent voluntary commitments by Verizon Wireless and Sprint Nextel to implement their proposed accuracy standards in connection with separate transactions approved by the Commission in 2008.

We also seek to refresh the record given that in response to the Bureau's September 2008 Public Notice, several parties proposed alternative timeframes for implementation of revised location accuracy standards, and approximately a year has passed since some of those proposals were made. For example, in addition to the timetables proposed by APCO, NENA, Verizon Wireless, Sprint, and AT&T, T-Mobile and the Rural Cellular Association suggested that several of the benchmarks proposed by AT&T should be extended by two years. We request that interested parties refresh the record on these proposed timeframes for implementation in light of the passage of time and any other relevant developments in the industry or economy.
