

California, southern Nevada, most of Arizona, and a small part of New Mexico; and is more specifically defined in the Conformed Criteria. New customers meeting the requirements established in the BCP marketing criteria and qualifying Native American Tribes within the BCP marketing area will be eligible to request an allocation of capacity and energy from the BCP resource pool. Native American Tribes need not have utility status to qualify for an allocation. As provided in the current BCP Implementation Agreement, new contractors, or contractors who receive an increased allocation will be required to reimburse existing BCP contractors for replacement capital advances to the extent existing contractors' allocations are reduced as a result of creating the resource pool.

Western is seeking comments regarding the applicability of the PMI to the BCP, the quantity of resources to be extended to existing contractors, the size of the proposed resource pool, excess energy provisions, and the term of contracts.

Under their respective State laws the Colorado River Commission (CRC) and the Arizona Power Authority (APA) have been the designated agents for acquiring and remarketing BCP power within Nevada and Arizona respectively. Western seeks comments regarding CRC and APA's role in Western's allocation process.

Following the public comment period, Western will analyze the comments received and publish its policy regarding the application of PMI to BCP in the **Federal Register**.

November 10, 2009.

On August 24, 2009, Goshen Powerhouse, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Goshen Dam Hydroelectric Project No. 13571, to be located at the existing Goshen Dam, on the Elkhart River, in Elkhart County, Indiana. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The existing dam is owned and operated by Elkhart County, Indiana and the existing powerhouse and headrace canal is owned and operated by the City of Goshen, Indiana. The proposed project would consist of: (1) The existing 12.5-foot-high concrete dam equipped with a 200-foot-long ogee spillway; (2) an existing 765-acre impoundment with a normal water surface elevation of 790.9 feet mean sea level; (3) an existing 25-foot-long by 49-foot-wide powerhouse to contain two new hydrokinetic turbine-generator systems for a total installed capacity of 80 kilowatts; (4) a new 60-foot-long, 12.5-kilovolt transmission line; and (5) appurtenant facilities. The proposed project would operate in a run-of-river mode and generate an estimated average annual generation of 578,160 kilowatt-hours.
