Abstract of proposed collection:

INA Section 221(d) requires that prior to the issuance of an immigrant visa the applicant undergo a physical and mental examination. INA Section 412(b)(4)(B) requires that the United States Government “provide for the identification of refugees who have been determined to have medical conditions affecting the public health and requiring treatment.” Form DS-2053, Medical Examination for Immigrant or Refugee Applicant (1991 Technical Instructions); Form DS-2054, Medical Examination for Immigrant or Refugee Applicant (2007 Technical Instructions); and DS-3030, Chest X-Ray and Classification Worksheet (2007 Technical Instructions) are designed to record the results of the medical examination. A panel physician performs the medical examination of the applicant and completes the forms.

A final rule was published by the Department of Health and Human Services (HHS) in the **Federal Register** on November 2, 2009 that amends HHS regulations to remove the Human Immunodeficiency Virus (HIV) from the definition of *communicable disease of public health significance* and to remove references to HIV from medical examinations for aliens. In order to comply with this rule, effective January 4, 2010, an emergency approval review has been requested from OMB.

The Department must make available to panel physicians conducting medical exams for visa applicants revised medical exam forms. Forms DS-2053, DS-2054 and DS-3030 are being revised to remove references to HIV.

Methodology:

The medical forms are sent to the applicant in the applicant’s package. The applicant takes the forms to the panel physician to use during the medical examination. The panel physician completes the medical examination and fills out the forms. The forms are then submitted in hard copy to the consular officer for processing.

November 16, 2009.

Edward Ramotowski,

Acting Deputy Assistant Secretary, Bureau of Consular Affairs, Department of State.
