SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-61006; File No. SR-OCC-2009-15]

Self-Regulatory Organizations; The Options Clearing Corporation; Order Approving Proposed Rule Change To Revise the Minimum Eligibility Criteria for Common Stock Loaned Through Stock Loan Programs and Deposited as Margin Collateral

November 16, 2009.

I. Introduction

On August 28, 2009, The Options Clearing Corporation (“OCC”) filed with the Securities and Exchange Commission (“Commission”) proposed rule change SR-OCC-2009-15 pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”).¹ The proposed rule change was published for comment in the **Federal Register** on October 6, 2009.² No comment letters were received on the proposal. This order approves the proposal.

II. Description

The proposed rule change revises minimum eligibility criteria applicable to common stock loaned through OCC’s Stock Loan Programs and deposited as margin collateral.

OCC’s clearing services involve common stock³ in several ways. Stocks are: (i) Underlying securities for exchange-traded equity option contracts; (ii) constituent securities of stock indexes that underlie stock index options or of indexes on which underlying ETFs are based; (iii) constituent securities of ETFs that although are not underlying securities are based on indexes that underlie index options (“Index Option Related ETFs”); (iv) the subject of stock loan or borrow transactions cleared pursuant to OCC’s Stock Loan Programs; and (v) deposited

with OCC as margin collateral.

Rationalizing the interrelationship among the criteria applied to stocks for these various purposes will maximize the potential for offsets and reduce risk in the clearing system.

Under OCC’s Stock Loan Programs, only loans of stocks that are either underlying securities for options or futures or ETFs based on a stock index underlying an index option contract are eligible for clearance through OCC (collectively, “Options-Related Stocks”). OCC restricted stock loan activity to limit its risk to loans supporting short sales that might be serving as hedges for options transactions or helping to add liquidity to the options markets. At the time this criterion was implemented in 2002, OCC managed the risk of stock loan transactions for most clearing members on a credit basis—that is OCC did not collect margin on such transactions. As noted above, OCC now requires margin on all stock loan transactions thus reducing the risk associated with this activity. Accordingly, OCC believes that it is no longer necessary or appropriate to limit stock loan transactions to Options-Related Stocks.

In connection with the foregoing change, OCC is supplementing its existing criteria for stock eligible for the Stock Loan Programs by requiring that in order to qualify as an “Eligible Stock” for purposes of the Stock Loan Programs a stock must be a “covered security” as defined in Section 18(b)(1) of the Securities Act of 1933.⁴ By agreement with the options exchanges, OCC already requires that all underlying stocks meet this criterion, and OCC believes that it is an appropriate minimum assurance of quality. In addition, OCC is imposing a \$3 minimum share price requirement that is applicable only to stocks other than Options-Related Stocks.⁵ OCC, however, retains the ability to waive the \$3 minimum price where specified other factors suggest that the stock is nevertheless suitable for inclusion in the Stock Loan Programs.

⁴ “Covered securities” are securities that are authorized for listing on the New York Stock Exchange, the American Stock Exchange (now known as NYSE Amex LLC), the National Market System of the Nasdaq Stock Market (collectively, “Exchanges”), or any other national securities exchange, or tiers thereof, that the Commission determines are substantially similar to the listing standards applicable to securities on the Exchanges. 15 U.S.C. 77r(b)(1).

⁵ This minimum price requirement corresponds to the minimum price standard contained in the criteria used by the options exchanges for initial selection of underlying securities that are also “covered securities.”

Common Stock as Collateral

Under current OCC Rule 604(b)(4), clearing members can deposit common stocks that meet the following criteria: Minimum price of \$3 per share and traded on a national securities exchange or traded in the Nasdaq Global Market or the Nasdaq Capital Market. The aggregate value of margin attributed to a single stock cannot exceed 10% of a clearing member’s total margin requirement. Stocks are haircut by 30% for margin valuation purposes. Stocks that have been suspended from trading by or are subject to special margin requirements under the rules of a listing market because of volatility, lack of liquidity, or similar characteristics are not eligible for deposit as margin.

Under the approved but not yet implemented Collateral in Margins program, any common stock that meets the above criteria except the minimum price requirement and that is deliverable upon exercise or maturity of a cleared contract (*i.e.*, is an underlying security), as well as index option related ETFs, will be afforded collateral value as determined by STANS. Moreover, the margin concentration requirement will be inapplicable to such deposits. Thus, upon implementation of the Collateral in Margins proposal, the minimum price requirement and margin concentration requirement will be eliminated for common stocks that are underlying securities or index option related ETFs. The minimum price requirement is being eliminated for these securities in order to provide a greater opportunity for members to hedge their equity options positions with pledges of the underlying securities. This decision also reflects OCC’s judgment that the minimum price requirement is less important in the current environment where OCC is able to closely monitor collateral in the form of common stock and to apply the sophisticated risk management technique incorporated in STANS in order to determine the appropriate value to assign to such collateral. The concentration test requirement is being eliminated because STANS contains its own built-in functionality that adequately handles concentrated options and collateral holdings.

In anticipation of the implementation of the Collateral in Margins program, and effective with such implementation, OCC further amends Rule 604(b)(4)(i) as follows:

(1) Replace the requirement of listing on a national securities exchange or specific Nasdaq markets with the requirement that all common stocks

¹ 15 U.S.C. 78s(b)(1).

³ The term “common stock” or “stock” is broadly used in this rule change to refer to different types of equity securities including ETFs but not preferred stock.
