Semiannual Regulatory Agenda, Fall 2009

AGENCY: Office of the Secretary, USDA.

ACTION: Semiannual regulatory agenda.

SUMMARY: This agenda provides summary descriptions of significant and not significant regulations being developed in agencies of the U.S. Department of Agriculture (USDA) in conformance with Executive Order 12866 “Regulatory Planning and Review.” The agenda also describes regulations affecting small entities as required by section 602 of the Regulatory Flexibility Act, Public Law 96-354. This agenda also identifies regulatory actions that are being

reviewed in compliance with section 610(c) of the Regulatory Flexibility Act. We invite public comment on those actions.

USDA has attempted to list all regulations and regulatory reviews pending at the time of publication except for minor and routine or repetitive actions, but some may have been inadvertently missed. There is no legal significance to the omission of an item from this listing. Also, the dates shown for the steps of each action are estimated and are not commitments to act on or by the date shown.

USDA’s complete regulatory agenda is available online at www.reginfo.gov. Because publication in the **Federal Register** is mandated for the regulatory flexibility agendas required by the Regulatory Flexibility Act (5 U.S.C. 602), USDA’s printed agenda entries include only:

- (1) Rules that are likely to have a significant economic impact on a substantial number of small entities; and
- (2) Rules identified for periodic review under section 610 of the Regulatory Flexibility Act.

For this edition of the USDA regulatory agenda, the most important significant regulatory actions and a Statement of Regulatory Priorities are included in the Regulatory Plan, which appears in both the online regulatory agenda and in part II of the **Federal Register** that includes the abbreviated regulatory agenda.

For this fall 2009 edition, regulations previously developed by the former Cooperative State Research, Education, and Extension Service (CSREES) will now appear under the new National Institute of Food and Agriculture (NIFA).

FOR FURTHER INFORMATION CONTACT: For further information on any specific entry shown in this agenda, please contact the person listed for that action. For general comments or inquiries about the agenda, please contact Michael Poe, Office of Budget and Program Analysis, U.S. Department of Agriculture, Washington, DC 20250, (202) 720-1272.

Dated: September 18, 2009.

Michael Poe,

Chief, Legislative and Regulatory Staff.

Proposed Rule Stage

**179. NATIONAL ORGANIC PROGRAM:
DAIRY REPLACEMENT ANIMALS
(LIVESTOCK)**

Legal Authority: 7 USC 6501

Abstract: The National Organic Program (NOP) is administered by the Agricultural Marketing Service (AMS). Under the NOP, AMS established national standards for the production and handling of organically produced products. Since implementation of the NOP, some members of the public have advocated for amending the regulations for sourcing dairy replacement animals. They have asserted that the current regulatory language on sourcing dairy replacement animals lacks clarity, has established an inequitable two track system, and has harmed organic dairy producers by creating an environment that has prevented the development of a market for organic dairy replacement animals. They seek amendment to the regulations to require that once a dairy operation has converted to organic production all future animals be organic from the last third of gestation.

**180. NATIONAL ORGANIC PROGRAM,
SUNSET (2011) (CROPS AND
PROCESSING) (TM-07-14)**

Legal Authority: 7 USC 6501

Abstract: The Agricultural Marketing Service (AMS) is amending regulations pertaining to the National List of Allowed and Prohibited Substances. As required by the National Organic Foods Production Act of 1990, the allowed use of the 12 synthetic and non-synthetic substances in organic production and handling will expire on September 12, 2011. The AMS published an advance notice of proposed rulemaking to make the public aware of this requirement. AMS

believes that public comment is essential in the review process to determine whether these substances should continue to be allowed or prohibited in the production and handling of organic agricultural products.

Long-Term Actions

184. NATIONAL ORGANIC PROGRAM: ADD STANDARDS FOR THE ORGANIC CERTIFICATION OF WILD CAPTURED AQUATIC ANIMALS, TM-01-08

Legal Authority: 7 USC 6501 to 6522

Abstract: The Agricultural Marketing Service (AMS) is revising regulations pertaining to labeling of agricultural products as organically produced and handled (7 CFR part 205). The term "aquatic animal" will be incorporated in the definition of livestock to establish production and handling

standards for operations that capture aquatic animals from the wild. Production standards for operations producing aquatic animals will incorporate requirements for livestock origin, feed ration, health care, living conditions, and recordkeeping. Handling standards for such operations will address prevention of commingling of organically produced commodities and prevention of contact between organically produced and prohibited substances.

186. EMERGENCY FOREST RESTORATION PROGRAM
Legal Authority: PL 110–246

Abstract: We are adding a new subpart to the regulations in 7 CFR part 701 to implement the Emergency Forest Restoration Program (EFRP), which was authorized by the 2008 Farm Bill. EFRP will provide cost-share funding to owners of nonindustrial private forest land to restore the land after the land is damaged by a natural disaster. The damaged land must have had a tree cover immediately before the natural disaster. The 2008 Farm Bill authorized such funds as may be necessary to be appropriated to carry out this program; the appropriated amounts are to remain available until expended.

187. BIOMASS CROP ASSISTANCE PROGRAM
Legal Authority: PL 110–246

Abstract: We are adding a new regulation to implement the Biomass Crop Assistance Program (BCAP) as required by the 2008 Farm Bill. We will collaborate with USDA/Rural Development (RD), private industry, agricultural and forest land owners to support the evaluation and selection of BCAP project areas. BCAP project areas must include a commitment to use local production; evidence of sufficient equity (if the facility is not operational at the time of proposal); anticipated economic impacts; opportunities for local ownership; the participation rate by beginning and socially disadvantaged farmers and ranchers; the impact on soil, water, and related resources; and the variety in biomass production approaches. FSA will partner with RD, which has capability and responsibility, including the

potential for providing funding for proposed biomass conversion facility, regarding BCAP project area evaluation and selection. After BCAP project area selection, FSA, acting on behalf of the Commodity Credit Corporation (CCC), may enter into contracts with BCAP project area producers for a term of up to 5 years for annual and perennial crops and up to 15 years for woody biomass.

188. FARM LOAN PROGRAMS LOAN MAKING ACTIVITIES
Legal Authority: PL 110–246

Abstract: The rule will implement the provisions of the 2008 Farm Bill that affect Farm Loan Programs (FLP) Loan Making Division (LMD); there is discretion involved in the implementation. The sections being implemented are: 5001, Direct Loans; 5005, Beginning Farmer or Rancher and Socially Disadvantaged Farmer or Rancher Contract Land Sales Program Down Payment Loan Program; 5101, Farming Experience as an Eligibility Requirement; 5201, Eligibility of Equine Farmers and Ranchers for Emergency Loans; 5301, Beginning Farmer and Rancher Individual Development Accounts Pilot Program; and 5501, Loans to Purchase Highly Fractionated Land.

A Beginning Farmer and Rancher Individual Development Accounts five-year pilot program will be established in at least 15 States. The program entails FSA making grants to qualified nonprofit organizations who then deliver the program to eligible participants. Grantees must match 50 percent of the grant received. Under the program, qualified, low-income beginning farmers or prospective beginning farmers would establish saving accounts with a monthly deposit plan administered by the grantees. The program funds must match the participants' deposits at a minimum of 100 percent and a maximum of 200 percent. Participants must use the savings account funds toward the purchase of farmland, livestock, or similar farm start-up/operating expenses. The program must be operated by and in conjunction with FSA farm loan programs. The initial applications for the program must be approved no more than one year after the law is enacted. The program is not mandatory; an appropriation of up to \$5 million annually is authorized to fund the program.

Individual tribal members will be allowed to qualify for Indian Land Acquisition loans.

189. CONSERVATION LOAN GUARANTEE PROGRAM
Legal Authority: PL 110–246

Abstract: The rule will implement the provisions of the 2008 Farm Bill that affect Farm Loan Programs (FLP) Loan Making Division (LMD); there is discretion in how several of the provisions are implemented. The section being implemented is 5002, Conservation Loan and Loan Guarantee. Implementation of this provision will

USDA—FSA

Proposed Rule Stage

create a new direct and guaranteed loan program directed at assisting farmers in implementing conservation practices.

The rule establishes a new loan and loan guarantee program to finance qualifying conservation projects. All guarantees will be at 75 percent of the loan amount. The applicant must have an acceptable conservation plan that includes the project(s) to be financed. Preference is given to beginning farmer and socially disadvantaged applicants,

conversion to sustainable or organic production practices, and compliance with highly erodible land conservation requirements. Eligibility for the program is not restricted to those who cannot get credit elsewhere. The program is not mandatory; appropriations are authorized.

RIN: 0560-AI04

Department of Agriculture (USDA)
 Farm Service Agency (FSA)

Final Rule Stage

190. LOAN SERVICING; FARM LOAN PROGRAMS

Legal Authority: PL 110-246

Abstract: The 2008 Farm Bill requires several changes to the Farm Service Agency (FSA) Farm Loan Program (FLP) loan servicing regulations. An overall plan will be established to insure that borrowers can be transitioned to private credit in the shortest timeframe practicable. At present, FSA monitors the status of all borrowers to determine if graduation is possible. The 2008 Farm Bill emphasizes this responsibility and insures that FSA uses all the tools available to graduate borrowers to commercial credit as soon as they can financially do so. In 2007, over 2,500 direct borrowers (about 3.7 percent of the portfolio) graduated to commercial credit. FSA believes graduation will

continue in the 3 to 5 percent range and is dependant on the overall farm economy.

The right of an FSA borrower-owner to purchase leased property under Homestead Protection will be extended beyond the borrower-owner to the immediate family. Currently, FSA only has 38 properties in Homestead Protection.

Acceleration and foreclosure will be suspended on borrowers who file a claim of program discrimination against the Department or have a claim pending. Interest accrual and offset will also be suspended during the time of the moratorium. If the borrower does not prevail in the claim, the interest, which would have accrued during the moratorium will be due and offset on the account will be reestablished.

191. ANIMAL WELFARE: MARINE MAMMALS; NONCONSENSUS LANGUAGE AND INTERACTIVE PROGRAMS (RULEMAKING RESULTING FROM A SECTION 610 REVIEW)

Legal Authority: 7 USC 2131 to 2159

Abstract: The U.S. Department of Agriculture regulates the humane handling, care, treatment, and transportation of certain marine mammals under the Animal Welfare Act. The present standards for these animals have been in effect since 1979 and amended in 1984. During this time, advances have been made and new information has been developed with

regard to the housing and care of marine mammals. This rulemaking addresses marine mammal standards on which consensus was not reached during negotiated rulemaking conducted between September 1995 and July 1996. These include standards affecting variances, indoor facilities, outdoor facilities, space requirements, and water quality, as well as swim-with-the-dolphin programs. These actions appear necessary to ensure that the minimum standards for the humane handling, care, treatment, and transportation of marine mammals in captivity are based on current general,

industry, and scientific knowledge and experience.

193. TUBERCULOSIS IN CATTLE; IMPORT REQUIREMENTS FOR ROPING STEERS

Legal Authority: 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This document will withdraw a proposed rule that we published on August 24, 2004 (69 FR 51960 to 51962, APHIS Docket No. 03-081-3). In our August 2004 proposed rule, we proposed to require that steers and spayed heifers with any evidence of horn growth that are entering the United States meet the same tuberculosis testing requirements as sexually intact animals entering the United States. Instead of proposing provisions specific to cattle imported for use at rodeos, as our August 2004 proposal did, APHIS is considering broader changes to the tuberculosis regulations.

195. IMPORTATION OF GRAPES FROM CHILE UNDER A SYSTEMS APPROACH

Legal Authority: 7 USC 450; 7 USC 7701 to 7772; 7 USC 7781 to 7786; 7 USC 8301 to 8317; 21 USC 136 and 136a

Abstract: We are proposing two changes related to our proposed rule published in the Federal Register on August 27, 2008, that would amend the fruit and vegetable regulations to allow fresh table grapes from Chile to be imported into the continental United States under a systems approach. Currently as a condition of entry, all table grapes from Chile have to be fumigated with methyl bromide as a risk-mitigation measure for *Brevipalpus chilensis*. On August 27, 2008, we proposed to allow a combination of risk-mitigation measures, or systems approach, to be employed in lieu of methyl bromide fumigation for *B. chilensis*. However, there is a new quarantine pest of table grapes, *Lobesia botrana*, in Chile, and the proposed systems approach does not address and was not intended to mitigate the risk for this pest. Therefore, this supplemental proposed rule modifies the proposed systems approach so that it is effective for *L. botrana*. Alternatively, it would require Chilean grapes that do not meet the conditions of the systems approach for *L. botrana* to be fumigated with methyl bromide as a condition of their importation into the continental United States.

196. SCRAPIE IN SHEEP AND GOATS

Legal Authority: 7 USC 8301 to 8317

Abstract: This rulemaking would amend the scrapie regulations by changing the risk groups and categories established for individual animals and for flocks, increasing the use of genetic testing as a means of assigning risk levels to animals, reducing movement restrictions for animals found to be genetically less susceptible or resistant to scrapie, and simplifying, reducing, or removing certain recordkeeping requirements. This action would provide designated scrapie epidemiologists with more alternatives and flexibility when testing animals in order to determine flock designations under the regulations. It would change the definition of high-risk animal, which will change the types of animals eligible for indemnity, and to pay higher indemnity for certain pregnant ewes and early maturing ewes. It would also make the identification and recordkeeping requirements for goat owners consistent with those for sheep owners. These changes would affect sheep and goat producers and State governments.

197. • PLANT PEST REGULATIONS; UPDATE OF GENERAL PROVISIONS

Legal Authority: 7 USC 450; 7 USC 2260; 7 USC 7701 to 7772; 7 USC 7781 to 7786; 19 USC 136; 21 USC 111; 21 USC 114a; 21 USC 136 and 136a; 31 USC 9701; 42 USC 4331 to 4332

Abstract: We are proposing to revise our regulations regarding the movement of plant pests. We are proposing to regulate not only plant pests, but also biological control organisms and noxious weeds. We are proposing risk-based criteria for determining the plant pest status of biological control organisms, providing for the

environmental release of organisms for the biological control of weeds, providing for exemption from permit requirements for certain plant pests, and adding relevant definitions. We are also proposing to revise our regulations regarding the movement of soil. These proposed changes would clarify the factors that would be considered when assessing the risks associated with certain organisms, facilitate the importation and interstate movement of regulated organisms, provide transparency of the assessment process, and address gaps in the current regulations.

Final Rule Stage

Animal and Plant Health Inspection Service (APHIS)

198. BOVINE SPONGIFORM ENCEPHALOPATHY; MINIMAL-RISK REGIONS AND IMPORTATION OF COMMODITIES; UNSEALING OF MEANS OF CONVEYANCE AND TRANSLOADING OF PRODUCTS

Legal Authority: 7 USC 450; 7 USC 1622; 7 USC 7701 to 7772; 7 USC 7781 to 7786; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701; 42 USC 4331 and 4332

Abstract: In a final rule published in the Federal Register on January 4, 2005, we amended the regulations regarding the importation of animals and animal products to establish a category of regions that present a minimal risk of introducing bovine spongiform encephalopathy into the United States via live ruminants and ruminant products and byproducts, and added Canada to this category. We also established conditions for the importation of certain live ruminants and ruminant products and byproducts from such regions. This rule will amend the regulations to broaden who is authorized to break seals on means of conveyances carrying certain ruminants of Canadian origin. Additionally, it will amend the regulations regarding the transiting through the United States of certain ruminant products from Canada to allow for direct transloading of the products from one means of conveyance to another in the United

States under Federal supervision. These actions will contribute to the humane treatment of ruminants shipped to the United States from Canada and remove an impediment to international trade, without increasing the risk of the BSE disease agent entering the United States.

RIN: 0579-AC03

200. NATIONAL VETERINARY ACCREDITATION PROGRAM (RULEMAKING RESULTING FROM A SECTION 610 REVIEW)

Legal Authority: 7 USC 8301 to 8317; 15 USC 1828

Abstract: This rulemaking will amend the regulations regarding the National Veterinary Accreditation Program to establish two accreditation categories in place of the current single category, to add requirements for supplemental training and renewal of accreditation, and to offer accreditation specializations. These changes are intended to support the Agency's animal health safeguarding initiatives, to involve accredited veterinarians in integrated surveillance activities, and to make the provisions governing our National Veterinary Accreditation Program more uniform and consistent.

Abstract: This action amended the foreign quarantine and user fee regulations by removing the exemptions from inspection for fruits and vegetables grown in Canada and the exemptions from user fees for commercial vessels, commercial trucks, commercial railroad cars, commercial aircraft, and international air passengers entering the United States from Canada. As a result of this action, all agricultural products imported from Canada are subject to inspection, and commercial conveyances, as well as airline passengers arriving on flights from Canada, will be subject to inspection and user fees. We took this action in part because we were not recovering the costs of our inspection activities at the U.S./Canada border. In addition, our data showed an increasing number of interceptions on the U.S./Canada border of prohibited material that originated in regions other than Canada that presents a high risk of introducing plant pests or animal diseases into the United States. These findings, combined with additional Canadian airport preclearance data on interceptions of ineligible agricultural products approaching the U.S. border from Canada, strongly indicated that we needed to expand and strengthen our pest exclusion and smuggling interdiction efforts at that border. In order to do this and to recover the costs of our existing inspection activity, we need to collect user fees from commercial conveyances and international air passengers entering the United States from Canada.

206. VIRAL HEMORRHAGIC SEPTICEMIA; INTERSTATE MOVEMENT AND IMPORT RESTRICTIONS ON CERTAIN LIVE FISH

Legal Authority: 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This rulemaking will establish regulations to restrict the interstate movement and importation into the United States of live fish that are susceptible to viral hemorrhagic septicemia, a highly contagious disease of certain fresh and saltwater fish. In 2005 and 2006, viral hemorrhagic septicemia was detected in freshwater fish in several of the Great Lakes and related tributaries. The disease has been responsible for several large-scale die-offs of wild fish in the Great Lakes region. This action is necessary to prevent further introductions into, and dissemination within, the United States of viral hemorrhagic septicemia.

207. CITRUS GREENING AND ASIAN CITRUS PSYLLID; QUARANTINE AND INTERSTATE MOVEMENT REGULATIONS

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786; 21 USC 136 and 136a

Abstract: This rulemaking will establish regulations that designate the State of Florida and one parish in Louisiana as quarantined areas for citrus greening, and Alabama, Florida, Guam, Hawaii, Puerto Rico, Louisiana, Mississippi, Texas, three counties in South Carolina, and portions of two counties in California as quarantined areas for Asian citrus psyllid, a vector of a bacterium that causes citrus greening. It would also establish restrictions on the interstate movement of regulated articles from the quarantined areas, as well as treatments under which Asian citrus psyllid host material may be moved interstate from a quarantined area. These actions follow the discovery of citrus greening and/or Asian citrus psyllid in the quarantined areas, and are necessary in order to prevent the spread of the disease and its vector to noninfested areas of the United States.

214. MINIMUM AGE REQUIREMENTS FOR THE TRANSPORT OF ANIMALS

Legal Authority: 7 USC 2131 to 2159

Abstract: This rulemaking would amend the Animal Welfare Act regulations by adding minimum age and weaning requirements for the transport in commerce of animals. The regulations currently contain such requirements for dogs and cats, but no corresponding ones for other regulated animals, despite the risks associated with the early transport of these species. The rule would also provide an exemption to allow animals to be transported without their mothers for medical treatment and for scientific research before reaching the minimum age and weaning requirement, provided certain conditions are met. Establishing minimum age requirements for the transport of animals and providing for the transport of animals that have not met the minimum age requirements are necessary to help ensure the humane treatment of these animals.

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786; 31 USC 9701

Abstract: This rulemaking would revise the regulations regarding the importation, interstate movement, and environmental release of certain genetically engineered organisms in order to bring the regulations into alignment with provisions of the Plant Protection Act. The revisions would also update the regulations in response to advances in genetic science and technology and our accumulated experience in implementing the current regulations. This is the first comprehensive review and revision of the regulations since they were established in 1987. This rule would

affect persons involved in the importation, interstate movement, or release into the environment of genetically engineered plants and certain other genetically engineered organisms.

216. ANIMAL WELFARE; CLIMATIC AND ENVIRONMENTAL CONDITIONS FOR TRANSPORTATION OF WARM-BLOODED ANIMALS OTHER THAN MARINE MAMMALS

Legal Authority: 7 USC 2131 to 2159

Abstract: This rulemaking would amend the Animal Welfare Act regulations regarding transportation of live animals other than marine mammals by removing the current ambient temperature requirements for various stages in the transportation of those animals. The action would replace those requirements with a single performance standard under which the animals would be transported under climatic and environmental conditions that are appropriate for their welfare. The regulations currently require that ambient temperatures be maintained within certain ranges during

USDA—APHIS

Long-Term Actions

transportation, but animals may be transported at ambient temperatures below the minimum temperatures if their consignor provides a certificate signed by a veterinarian certifying that the animals are acclimated to temperatures lower than the minimum temperature. This proposal would make acclimation certificates for live animals other than marine mammals unnecessary. This rule would replace a previously published proposed rule, which we are withdrawing as part of this document, that would have required that the acclimation certificate for a dog or cat be signed by the owner of the dog or cat being transported rather than by a veterinarian. This rulemaking does not address marine mammals due to their unique requirements for care and handling. We believe that establishing a single performance standard would ensure that warm-blooded animals other than marine mammals are transported in climatic and environmental conditions that are not detrimental to their welfare while allowing for variations in climatic and environmental conditions that are suitable for individual animals.

217. IMPORTATION OF CATTLE FROM MEXICO; ADDITION OF PORT AT SAN LUIS, ARIZONA

Legal Authority: 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This rulemaking will amend the regulations regarding the importation of cattle from Mexico by adding San Luis, AZ, as a port through which cattle that have been infested with fever ticks or exposed to fever ticks or tick-borne diseases may be imported into the United States. A new facility for the handling of animals is to be constructed on the Mexican side of the border at the port of San Luis, AZ, that will be equipped with facilities necessary for the proper chute inspection, dipping, and testing that are required for such cattle under the regulations. The rule will also amend the regulations to remove provisions that limit the admission of cattle that have been infested with fever ticks or exposed to fever ticks or tick-borne diseases to the State of Texas. The statutory requirement that limited the admission of those cattle to the State of Texas has been repealed. These changes make an additional port of entry available and relieve restrictions on the movement of imported Mexican cattle within the United States.

218. HANDLING OF ANIMALS; CONTINGENCY PLANS

Legal Authority: 7 USC 2131 to 2159

Abstract: This rulemaking will amend the Animal Welfare Act regulations to add requirements for contingency planning and training of personnel by research facilities and by dealers, exhibitors, intermediate handlers, and carriers. These requirements are necessary because we believe all licensees and registrants should develop a contingency plan for all animals regulated under the Animal Welfare Act in an effort to better prepare for potential disasters. This action will heighten the awareness of licensees and registrants regarding their responsibilities and help ensure a timely and appropriate response should an emergency or disaster occur.

220. STANDARDS FOR PERMANENT, PRIVATELY OWNED HORSE QUARANTINE FACILITIES (COMPLETION OF A SECTION 610 REVIEW)

Legal Authority: 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This rulemaking will establish standards for the approval of permanent, privately owned quarantine facilities for horses. We are taking this action because regional and seasonal demand for quarantine services for horses often exceeds the space available at existing facilities. Allowing imported horses to be quarantined in permanent, privately owned quarantine facilities that meet these newly proposed criteria facilitates the importation of horses while continuing to protect against the introduction of communicable diseases of horses.

221. USER FEES; EXPORT CERTIFICATION FOR PLANTS AND PLANT PRODUCTS

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786; 7 USC 8301 to

8317; 21 USC 136 and 136a; 49 USC 80503

Abstract: This rulemaking amends the user fee regulations by adjusting the fees charged for export certification of plants and plant products. We are increasing these user fees for fiscal years 2009 through 2012 to reflect the anticipated costs associated with providing these services during each year. This action adds a new user fee for Federal export certificates for plants and plant products that an exporter obtains from a State or county cooperator in order to recover our costs associated with that service. Finally, the action makes several nonsubstantive changes to the regulations for clarity. These changes will enable us to properly recover the costs of providing export certification services for plants and plant products.

222. ● PALE CYST NEMATODE; QUARANTINE AND REGULATIONS

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786; 21 USC 136 and 136a

Abstract: This action will quarantine parts of Bingham and Bonneville Counties, ID, due to the discovery of the potato cyst nematode there and establish restrictions on the interstate movement of regulated articles from the quarantined area. This action is necessary on an emergency basis to prevent the spread of the potato cyst nematode to noninfested areas of the United States.

223. BOVINE TUBERCULOSIS

Legal Authority: 7 USC 8301 to 8317

Abstract: This rulemaking would amend the bovine tuberculosis regulations by removing from incorporation by reference the Bovine Tuberculosis Eradication Uniform Methods and Rules, 1999, and including in 9 CFR part 77 all Federal requirements. We are also proposing a number of substantive changes to the requirements in order to enhance our bovine tuberculosis eradication efforts. The proposed changes include, but are not limited to, tightening certain tuberculosis surveillance and reporting requirements; strengthening the quarantine and quarantine-release requirements; setting minimum testing ages, depending upon the status of the State or zone of origin and/or the purpose of movement, when testing is required for interstate movement of cattle and bison; adding new requirements to prevent the spread of tuberculosis from wildlife to cattle and bison; adding new requirements for interstate movement of dairy cattle; strengthening the requirements for individual cattle and bison that are to be added to accredited herds; and providing for the interstate movement of commuter herds. Finally, we would reorganize 9 CFR part 77 to make the regulations clearer and easier to use.

224. ● CITRUS CANCKER; MOVEMENT OF FRUIT FROM QUARANTINED AREAS**Legal Authority:** 7 USC 7701 to 7772; 7 USC 7781 to 7786

Abstract: This action will amend the citrus canker regulations to modify the conditions under which fruit may be moved interstate from a quarantined area. We will eliminate the requirement that each lot of finished fruit be inspected at the packinghouse and found to be free of visible symptoms of citrus canker, and we will remove the current prohibition on the movement of fruit from a quarantined area to commercial citrus-producing States. We will continue to require fruit moved interstate from a quarantined area be treated with an approved disinfectant and packed in a commercial packinghouse that operates under a compliance agreement. These changes will relieve some restrictions on the interstate movement of fresh citrus fruit from quarantined areas while maintaining conditions that will prevent the artificial spread of citrus canker.

225. ● USER FEES FOR AGRICULTURAL QUARANTINE AND INSPECTION SERVICES**Legal Authority:** 7 USC 7701 to 7772; 7 USC 7781 to 7786; 7 USC 8301 to 8317; 21 USC 136 and 136a; 49 USC 80503

Abstract: This action will amend the user fee regulations by adjusting the fees charged for certain agricultural quarantine and inspection (AQI) services that are provided in connection with certain commercial vessels, commercial trucks, commercial railroad cars, commercial aircraft, and international airline passengers arriving at ports in the customs territory of the United States. The recent downturn in the U.S. economy has negatively impacted travel volumes, and, as a result, our user fee collections, which fund these services, have diminished. Because there has been no corresponding decrease in the risk of plant and animal pest and disease introduction into the United States, we have continued to provide inspection and related support services at the same level as we did before the downturn; however, our user fee collections have not been sufficient to enable us to recover fully the costs of providing those services and maintain

a reasonable reserve balance. We are therefore increasing our AQI user fees in order to provide adequate funds for these purposes.

229. SPECIAL AREAS; STATE-SPECIFIC INVENTORIED ROADLESS AREA MANAGEMENT: COLORADO

Legal Authority: Not Yet Determined

Abstract: On April 11, 2007, Governor of Colorado Ritter submitted a petition under the provisions of the Administrative Procedure Act (5 U.S.C. 553(e)) and Agriculture Department regulation (7 CFR 1.28) to promulgate regulations, in cooperation with the State, for the management of inventoried roadless areas within the State of Colorado. After review and recommendation by the Roadless Area Conservation National Advisory Committee, the Secretary accepted the Governor's petition and initiated a proposed rulemaking for inventoried roadless areas in Colorado. The proposed rulemaking would manage Colorado's inventoried roadless areas by prohibiting road building and tree

cutting, with some exceptions, on 4.1 million acres of inventoried roadless areas in Colorado. The 4.1 million acres reflect the most updated IRA boundaries for Colorado, which incorporate planning rule revisions since 2001 on several Colorado national forests. Inventoried roadless areas that are allocated to ski area special uses (approximately 10,000 acres) would also be removed from roadless designation. Road construction and reconstruction plus timber harvesting would be prohibited in inventoried roadless areas, with some exceptions, on the Arapaho-Roosevelt, Grand Mesa-Uncompahgre, Gunnison, Manti-La Sal, Pike-San Isabel, Rio Grande, Routt, San Juan, and White River National Forests in Colorado. Exceptions to the prohibitions would be allowed for certain health, safety, valid existing rights, resource protection, and ecological management needs.

232. RENEWABLE ENERGY—CLARIFY REQUIREMENTS FOR CONSTRUCTION/DEVELOPMENT OF ENERGY PROGRAM PROJECTS (RULEMAKING RESULTING FROM A SECTION 610 REVIEW)

Legal Authority: 5 USC 301; 7 USC 1989; 42 USC 1480

Abstract: This regulation provides financial assistance to agricultural producers and rural small businesses for the purpose of purchasing and installing renewable energy systems and energy efficiency improvements in rural areas. Financial assistance to any single entity may be provided as a guaranteed loan or grant, or a combination of a loan and grant. Since the programs inception, it has become evident that some of the language in the existing regulation was misinterpreted by field offices and applicants. The changes are as follows:

- Clarify that surety requirements for projects under \$100,000, no surety is required. For projects between \$100,000 and \$200,000, no surety would be required if the contractor will accept payment as a “lump sum” at the end

of the work. For projects more than \$200,000, surety is required.

- The requirements for a review of plans and specifications by the Agency will refer to either the State Architect or State Engineer to perform the review rather than just an Agency employee.

- Clarify contract administration requirements for a design/build contract of more than \$200,000.

- Compliance with Executive Order 11246 is necessary for all construction contracts issued by non-profit applicants (not just those in excess of \$10,000).

- Non-profits must meet the requirements of 7 CFR 3019.40-48(e). Additional changes for non-for-profit entities are required as well. (The vast majority of Renewable Energy applicants are “for profit” entities. However, some non-profits are acceptable applicants.) The regulation does not adequately cover the additional requirements for a non-profit entity.

- Revise procurement, construction contract and construction

administration requirements. The present language needs to incorporate “lessons learned” with the experience gained in the five years since the inception of this new program.

- Include minor revisions to the application, application processing, and grant/loan-making requirements to clarify intentions not fully explained in the existing 7 CFR 4280 language.
