Title: NSPS for the Fossil-Fuel-Fired Steam Generating Units.

ICR Numbers: EPA ICR Number 1052.09, OMB Control Number 2060–0026.

ICR Status: This ICR is scheduled to expire on January 31, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Entities potentially affected by this action are the owners or operators of fossil fuel fired steam generating units. The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A and any changes, or additions to the General Provisions specified at 40 CFR part 60, subpart D. Owners or operators of the affected facilities must: Make one-time-only notification of occurrences such as construction/reconstruction and startup; submit reports containing information such as monitoring system performance and excess emissions; and maintain records of occurrences such as startups and shutdowns. Reports, at a minimum, are required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is

estimated to average 47 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Fossil-fuel-fired steam generating units.

Estimated Number of Respondents: 660.

Frequency of Response: Initially, occasionally, and semiannually.

Estimated Total Annual Hour Burden: 61,545.

Estimated Total Annual Cost: \$15,688,147, which includes \$5,788,147 in labor costs, no annualized capital/startup costs, and O&M costs of \$9,900,000.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for respondents is very low, negative, or non-existent. Therefore, the labor hours in the previous ICR reflect the current burden to the respondents and are reiterated in this ICR. There is a minor change to the cost figures, since the previous ICR used a technical labor rate only. The updated labor categories and associated rates result in an increase to total labor cost. Additionally, the previous ICR rounded to the nearest \$1,000; this ICR presents cost figures which differ by less than \$500 from the previous ICR due to using exact figures instead of rounding.

Dated: December 9, 2009.

Director, Collection Strategies Division.
