

Rules and Regulations

Federal Register

Vol. 74, No. 242

Friday, December 18, 2009

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 301

[Docket No. APHIS–2009–0036]

Karnal Bunt; Regulated Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule as final rule.

SUMMARY: We are adopting as a final rule, without change, an interim rule that amended the Karnal bunt regulations to remove certain areas or fields in Riverside County, CA, from the list of regulated areas based on our determination that those areas or fields meet our criteria for release from regulation of Karnal bunt, a fungal disease of wheat. This interim rule relieved restrictions on certain areas or fields that are no longer necessary.

DATES: Effective on **December 18, 2009**, we are adopting as a final rule the interim rule that was published at 74 FR 26774–26777 on June 4, 2009, and that was corrected in a document that was published at 74 FR 27423 on June 10, 2009.

FOR FURTHER INFORMATION CONTACT: Ms. Lynn Evans-Goldner, Karnal Bunt Program Manager, Plant Pathogen and Weed Programs, EDP, PPQ, APHIS, 4700 River Road Unit 26, Riverdale, MD 20737–1236; (301) 734–7228.

SUPPLEMENTARY INFORMATION:

Background

Karnal bunt is a fungal disease of wheat (*Triticum aestivum*), durum wheat (*Triticum durum*), and triticale (*Triticum aestivum* X *Secale cereale*), a hybrid of wheat and rye. Karnal bunt is caused by the fungus *Tilletia indica* (Mitra) Mundkur and is spread

primarily through the planting of infected seed followed by very specific environmental conditions matched during specific stages of wheat growth. The U.S. Department of Agriculture's Animal and Plant Health Inspection Service (APHIS) regulates the movement of articles in the United States that could spread Karnal bunt and works toward eventual eradication of Karnal bunt through bio-sanitary measures.

In an interim rule¹ effective and published in the **Federal Register** on June 4, 2009 (74 FR 26774–26777, Docket No. APHIS–2009–0036), we amended the Karnal bunt regulations contained in 7 CFR 301.89–1 through 301.89–16 by removing certain areas or fields in Riverside County, CA, from the list of regulated areas in § 301.89–3(g). That action was based on our determination that these fields or areas are eligible for release from regulation under the criteria in § 301.89–3(f). The interim rule relieved restrictions on fields within those areas that were no longer necessary. As a result of the interim rule, 286 fields and 8,226 acres were removed from the list of regulated areas in Riverside County, CA; 35,271 acres in Riverside County remain regulated for Karnal bunt.

Comments on the interim rule were required to be received on or before August 3, 2009. We received one comment by that date, from a wheat industry organization. The commenter supported the interim rule. Therefore, for the reasons given in the interim rule, we are adopting the interim rule as a final rule without change.

This action also affirms the information contained in the interim rule concerning Executive Order 12866 and the Regulatory Flexibility Act, Executive Orders 12372 and 12988, and the Paperwork Reduction Act.

Further, for this action, the Office of Management and Budget has waived its review under Executive Order 12866.

List of Subjects in 7 CFR Part 301

Agricultural commodities, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Transportation.

PART 301—DOMESTIC QUARANTINE NOTICES

■ Accordingly, we are adopting as a final rule, without change, the interim rule amending 7 CFR part 301 that was published at 74 FR 26774–26777 on June 4, 2009, and that was corrected in a document that was published at 74 FR 27423 on June 10, 2009.

Done in Washington, DC, this 11th day of December 2009.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

Animal and Plant Health Inspection Service

9 CFR Part 77

[Docket No. APHIS–2009–0046]

Tuberculosis in Cattle and Bison; State and Zone Designations; Michigan

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule and request for comments.

SUMMARY: We are amending the bovine tuberculosis regulations to adjust the boundaries of the modified accredited and modified accredited advanced tuberculosis risk classification zones for the State of Michigan. We have determined that Antrim, Charlevoix, Cheboygan, Crawford, Emmet, and Otsego Counties, MI, which are currently designated as modified accredited, now meet our requirements for modified accredited advanced status. Therefore, we are removing these six counties from the list of modified accredited zones and adding them to the list of modified accredited advanced zones. This action lessens restrictions on the interstate movement of cattle and bison from these areas of Michigan.

DATES: This interim rule is effective **December 18, 2009**. We will consider all comments that we receive on or before **February 16, 2010**.

Compliance Date: The date for complying with the identification requirements for sexually intact heifers moving from the modified accredited
