SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we complete the CCP process for Kirtland's Warbler WMA, which began by publishing a notice of intent (71 FR 20722, April 21, 2006). For more information about the initial process, see that notice. We released the draft CCP and EA to the public, announcing and requesting comments in a notice of availability (74 FR 16887, April 13, 2009).

The U.S. Fish and Wildlife Service established the wildlife management area in the early 1980s due, in part, to the recommendations of the Kirtland's Warbler Recovery Team. The original goal was to acquire 7,500 acres of land on which habitat would be managed for the benefit of Kirtland's Warbler. At present, the area contains 124 separate tracts totaling 6,582 acres.

The Draft CCP/EA was released for public review April 3, 2009; the comment period lasted 42 days ending May 15, 2009. By the conclusion of the comment period we received 5 written responses from organizations and individuals. In response to these comments we made a number of minor edits to the final document.

Selected Alternative

After considering the comments received, we have selected Alternative 3 (Ecological Management and Land Ownership Consolidation) for implementation. Under the selected alternative we would seek to manage existing lands as suggested in Alternative 2, but would also explore land exchanges with the State (and possibly U.S. Forest Service) to consolidate State and WMA parcels. Proposed land exchanges would likely increase the total area of land managed for Kirtland's Warbler, as well as increase management efficiency by both federal and state agencies. Existing lands and any new lands acquired through exchange would be managed to benefit the Kirtland's Warbler and other native flora and fauna of jack pine ecosystems. However, the way jack pine stands would be managed would be shifted towards a more ecologically-based approach rather than the highly intensive manner of present habitat management that produces jack pine plantations. For instance, if consolidation would occur and the Service would obtain upland jack pine stands in the eastern Upper Peninsula,
