In the Second Report and Order and Further Notice of Proposed Rulemaking, the Commission extended by twelve months the existing 2006 deadline in Section 76.1204(a)(1) prohibiting the deployment of integrated navigation devices by multichannel video programming distributors in order to promote the

retail sale of non-integrated navigation devices. This extension was intended to afford cable operators additional time to investigate and develop a downloadable security solution that will allow common reliance by cable operators and consumer electronics manufacturers on an identical security function without the additional costs of physical separation inherent in the point-of-deployment module, or CableCARD, solution. The rules adopted in this proceeding added information collection requirements to this collection and also were intended to implement Section 629 of the Communications Act of 1934, as amended, 47 U.S.C. § 549.

Synopsis

On December 17, 2009, the National Association of Telecommunications Officers and Advisors, the United States Conference of Mayors, the National League of Cities, the National Association of Counties, and the American Planning Association filed a petition¹ requesting that the Commission reconsider or clarify its decision² interpreting provisions in Section 332(c)(7) of the

Communications Act, as amended.³ Petitioners argue in their Petition that the Commission's adoption of a 30-day review period for local authorities to determine the completeness of a wireless facilities siting request exceeds its authority under its own interpretation, does not allow local authorities to toll the adopted time limits for other reasons, and will result in significant unintended consequences. The Petition also argues that the Commission did not provide affected parties the opportunity for input before adopting the 30-day review period.
