GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090-0086]

General Services Administration Acquisition Regulation; Submission for OMB Review; GSA Form 1364, Proposal To Lease Space

AGENCY: Acquisition Policy Division, GSA.

ACTION: Notice of request for comments regarding a reinstatement of an information collection requirement for an existing OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the General Services Administration will be submitting to the Office of Management and Budget (OMB) a request to review and approve a revision to the reinstatement of a previously approved information collection requirement regarding GSA Forms 1364/1364A, Proposal to Lease Space (Not Required by Regulation). This form is used to obtain information about property being offered for lease to house Federal agencies. In the past, GSA also used a 1364A which requested information regarding how tenant improvements were financed by a prospective lessor. The new version of form combines the former 1364 and 1364A, and it also collects other financial aspects contained in an offer for analysis and negotiation into lease contracts (e.g. real estate taxes, adjustments for vacant space, offerors' design and construction fees). A request for public comments was published in the **Federal Register** at 74 FR 52811, on October 14, 2009. No comments were received.

Public comments are particularly invited on: Whether this collection of

information is necessary and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate and based on valid assumptions and methodology; and ways to enhance the quality, utility, and clarity of the information to be collected.

DATES: Submit comments on or before: February 12, 2010.

JHS Exam 2 began September 26 2005, followed by a more

comprehensive Exam 3 that began in February 2009. The two new exams include some repeated measures from Exam 1 and several new components, including distribution of self-monitoring blood pressure devices. The continuation of the study allows continued assessment of subclinical coronary disease, left ventricular dysfunction, progression of carotid atherosclerosis and left ventricular hypertrophy, and responses to stress, racism, and discrimination as well as new components such as renal disease, body fat distribution and body composition, and metabolic consequences of obesity.
