

Environmental Impact Statement (EIS) and Record of Decision. Because of the significance of paleontological, botanical, hydrological, and cultural resources present within the CTA study area and the need for additional public input, the BLM is preparing a Supplemental EIS. The BLM proposes to establish a final boundary for the CTA. This decision was not made in the 2004 Record of Decision. The CTA study area is located in the northern portion of the Las Vegas Valley. A defined final boundary is needed to ensure protection of sensitive resources, including fossils, cultural resources, the natural functioning of the wash, and endemic plants on public lands available for disposal within the CTA study area, in accordance with applicable laws.

Six alternatives for boundaries are analyzed, ranging from approximately 13,000 acres to less than 1,500 acres. Alternative A, at 12,953 acres, includes the fossil formation, sensitive cultural and plant resources, active wash, the adjacent alluvial fan, and a one mile resource protection zone around northern and eastern boundaries of the Las Vegas Paiute reservation. Alternative B, at 11,008 acres, includes the fossil formation, sensitive cultural and plant resources, active wash, and the adjacent alluvial fan. Alternative B is the BLM's Preferred Alternative. Alternative C, at 6,362 acres, includes the fossil formation, sensitive cultural and plant resources, active wash, and a portion of the adjacent alluvial fan. Alternative D, at 5,301 acres, includes most of the fossil formation, the sensitive cultural and rare plant resources, and the active wash. Alternative E, at 3,314 acres, includes some of the fossil formation, the sensitive cultural and rare plant resources, and part of the active wash. The No Action alternative, at 1,448 acres, includes the Tule Spring cultural site and the 300-acre Eglington Preserve. Scoping of the project occurred from June 6 to August 20, 2007, and was extended to September 4, 2007. A total of 1,183 individuals submitted comments. Comments received pertained to a variety of broad categories, including alternatives, boundaries, management, and physical/natural resources. Additional stakeholder involvement has been achieved through the BLM's newsletters that provided updates on the Supplemental EIS process.

The Draft Supplemental EIS addresses the following issues identified during scoping: NEPA process (consultation/coordination, proposal description, alternatives, and connected actions/cumulative impacts); social resources

(cultural resources, visual resources, noise, land use, recreation, transportation, and socioeconomic resources); and physical/natural resources (botanical resources, water resources, paleontological resources, and geologic/soil resources).

Maps of the CTA study area and the alternatives being analyzed in the Supplemental EIS are available at the BLM Las Vegas Field Office. Please note that public comments and information submitted including names, street addresses, and e-mail addresses of persons who submit comments will be available for public review and disclosure at the above address during regular business hours (8 a.m. to 4 p.m.), Monday through Friday, except holidays.

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.
