

Please estimate the amount of time and resources that would be necessary for market participants that are excluded from the Commission's section 205 jurisdiction to comply with the Commission's EQR filing requirements and provide explanation and support for any estimate.

15. In addition, as described above in section I.C., the Commission is evaluating whether refinements are needed to improve the effectiveness and analytical potential of the existing EQR filing requirements. Accordingly, the Commission requests comments on the following additional questions:

(7) Should the EQR filing requirements include the date on which parties to a reported transaction agreed upon a price (trade date) and type of rate by which the price was set (*i.e.*, fixed price, a formula, or an index)? If so, how should the trade date be defined and are there any issues in determining the trade date for sales under master agreement or evergreen contracts?

(8) Should the Commission collect information about the resale of financial transmission rights in secondary markets? Would collecting this information enhance market transparency? If so, what current EQR filing requirements should be imposed on resales of financial transmission rights in secondary markets? Include data elements from the Commission's EQR Data Dictionary, version 1.1 (issued October 28, 2008) and explain how the information with respect to these specific data elements would improve market transparency. In addition, identify all other filing requirements that may be applicable to resales of financial transmission rights in secondary markets that are not current EQR filing requirements and explain whether and, if so, how collection of the information would improve market transparency.

(9) Should the Commission require market participants to use a standardized unit for reporting energy and capacity transactions (*i.e.*, \$/MWh or \$/MWmonth for energy and \$/MW or \$/KW for capacity)? Would requiring market participants to use a standardized unit enhance market transparency?

(10) Should the Commission eliminate the requirement to report the time zone in the contract section of the EQR? Would doing so be detrimental to the market as a whole?

Title: Tips and Complaints Regarding Environmental Violations.

ICR Numbers: EPA ICR No. 2219.03, OMB Control No. 2009-0032.

ICR Status: This ICR is scheduled to expire on 2/28/2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other

appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA tips and complaints web form is intended to provide an easy and convenient means by which members of the public can supply information to EPA regarding suspected violations of environmental law. The decision to provide a tip or complaint is entirely voluntary and use of the web form when supplying a tip or complaint is also entirely voluntary. Tippers need not supply contact information or other personal identifiers. Those who do supply such information, however, should know that this information may be shared by EPA with appropriate administrative, law enforcement, and judicial entities engaged in investigating or adjudicating the tip or complaint.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average one-half hour per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Anyone wishing to file a tip or complaint.

Estimated Annual Number of Respondents: 7,560.

Estimated Total Annual Hour Burden: 3,780.

Estimated Total Annual Cost: \$75,146.

Changes in the Estimates: There is an increase of 1980 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects the fact that tips and complaints are being filed at a higher rate than originally anticipated, a strong indication of the success of this program. There has been no change in the information being reported or the estimated burden per respondent.

Dated: January 21, 2010.

John Moses,

Director, Collection Strategies Division.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at 202-564-7146 or <http://www.epa.gov/compliance/nepa/>.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated July 17, 2009 (74 FR 34754).

Notice

In accordance with Section 309(a) of the Clean Air Act, EPA is required to make its comments on EISs issued by other Federal agencies public. Historically, EPA has met this mandate by publishing weekly notices of availability of EPA comments, which includes a brief summary of EPA's comment letters, in the **Federal Register**. Since February 2008, EPA has been including its comment letters on EISs on its Web site at: <http://www.epa.gov/compliance/nepa/eisdata.html>.

Including the entire EIS comment letters on the Web site satisfies the Section 309(a) requirement to make EPA's comments on EISs available to the public. Accordingly, after March 31, 2010, EPA will discontinue the publication of this notice of availability of EPA comments in the **Federal Register**.

Draft EISs

EIS No. 20080460, ERP No. D-FHW-40186-CO, I-70 East Project, Transportation Improvement from I-70 East from 1-25 to Tower Road, Funding, City and County Denver, CO.

Summary: EPA expressed environmental concern about air quality impacts. EPA recommended additional mitigation for PM10 impacts, dispersion modeling and possible additional mitigation for MSAT impacts. Rating EC2.
