SUPPLEMENTARY INFORMATION:

OMB Control No: 3060-0953.

Title: Sections 95.1111 and 95.1113, Frequency Coordination/Coordinator, Wireless Medical Telemetry Service. Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit and not-for-profit institutions.

Number of Respondents: 2,728 respondents; 2,728 responses.

Estimated Time Per Response: 4 hours (average).

Frequency of Response: On occasion reporting requirement, third party

disclosure requirement, and recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits.

Total Annual Burden: 10,912 hours.

Total Annual Cost: \$545,000.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: No information is requested that would require assurance of confidentiality.

Need and Uses: The Commission will submit this expiring information collection to the Office of Management and Budget (OMB) as an extension (no change in the reporting, recordkeeping and/or third party disclosure requirements). The Commission's burden estimate for the number of respondents increased from 2,500 to 2,728 with this submission to the OMB. This adjustment in the number of respondents is to reflect more accurate estimates that the Commission has obtained over time.

On June 12, 2000, the Commission adopted rules which allocated spectrum for Wireless Medical Telemetry Service (WMTS) that allows potentially life-critical equipment to operate in an interference-protected basis. Medical telemetry equipment is used in hospitals and health care facilities to transmit patient measurement data such as pulse and respiration rate to a nearby receiver, permitting greater patient mobility and increased comfort. The Commission designated a frequency coordinator, who maintains a database of all WMTS equipment. All parties using equipment in the WMTS are required to coordinate/register their operating frequency and other relevant technical operating parameters with the designated coordinator. The database provides a record of the frequencies used by each facility or device to assist parties in selecting frequencies to avoid interference. Without the database, there would be no record of WMTS usage because WMTS transmitters will not be individually licensed. The designated frequency coordinator has the responsibility to maintain an accurate engineering database of all WMTS transmitters, identified by location (coordinates, street address, building), operating frequency, emission type and output power, frequency range(s) used, modulation scheme used, effective radiated power, number of transmitters in use at the health care facility at the time of registration, legal name of the authorized health care provider, and point of contact for authorized health care provider. The frequency coordinator will make the database available to WMTS users, equipment manufacturers and the public. The

coordinator will also notify users of potential frequency conflicts.

SUPPLEMENTARY INFORMATION:

OMB Control No: 3060-0895.
Title: Section 52.15, Numbering Resource Optimization, CC Docket No. 99-200.

Form No.: FCC Form 502.
Type of Review: Extension of a currently approved collection.
Respondents: Business or other for-profit.
Number of Respondents: 2,780 respondents; 7,385 responses.
Estimated Time Per Response: 1 - 44.4 hours.

Frequency of Response: On occasion and semi-annual reporting requirements and recordkeeping requirement.

Obligation to Respond: Mandatory. Statutory authority for this collection of information is contained in 47 U.S.C. sections 151, 153, 154, 201-205, and 251.

Total Annual Burden: 131,782 hours.
Total Annual Cost: \$3,462,800.
Privacy Act Impact Assessment: N/A.
Nature and Extent of Confidentiality: Disaggregated, carrier specific forecast and utilization data will be treated as confidential and will be exempt from public disclosure under 5 U.S.C. 552(b)(4).

Need and Uses: The Commission is requesting an extension (no change in the reporting and/or recordkeeping requirements) in order to obtain the full three year clearance from the Office of Management and Budget (OMB). There is no change to the Commission's burden estimates.

The data collected on FCC Form 502 helps the Commission manage the ten-digit North American Numbering Plan (NANP), which is currently being used by the United States and 19 other countries. Under the Communications Act of 1934, as amended, the Commission was given "exclusive jurisdictions over those portions of the North American Numbering Plan that pertain to the United States." Pursuant to that authority, the Commission adopted a Report and Order in 2000 that among other things addressed regular reporting on numbering use by United States carriers.

There are seven information collection requirements in this submission to the OMB. They are: 1) utilization/forecast report; 2) application for initial numbering resources; 3) application for growth numbering resources; 4) recordkeeping requirement; 5) notification by state commissions; 6) demonstration to state commissions; and 7) petitions for additional delegation of numbering authority.

The data from this collection of information is used by the FCC, state regulatory commissions, and the NANPA to monitor numbering resource utilization by all carriers using the resource and to project the dates of area code and NANP exhaust.
