Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule; correction.

SUMMARY: FEMA is correcting a table for Ransom County, North Dakota, and Incorporated Areas.

FOR FURTHER INFORMATION CONTACT: Kevin C. Long, Acting Chief,

Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-2820 or (e-mail) kevin.long@dhs.gov.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) proposes determinations of Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs for communities participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a). These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are minimum requirements. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management

requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

Correction

FEMA is correcting a table in a proposed rule which published on May 26, 2009, at 74 FR 24729. The table for Ransom County, North Dakota, and Incorporated Areas contained incorrect information for the flooding source "Sheyenne River."

The May 26, 2009, proposed rule contained a table entitled "Ransom County, North Dakota, and Incorporated Areas," which contained errors. For flooding source "Sheyenne River," the table contained inaccurate information as to the communities affected. FEMA is now publishing a revised table for Ransom County, North Dakota, and Incorporated Areas, containing the accurate information, to address these prior errors. The information provided in the table below should be used in lieu of the table published on May 26, 2009.

Flooding source(s)	Location of referenced elevation**	*Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground ^ Elevation in meters (MSL)		Communities affected
		Effective	Modified	
Ransom County, North Dakota, and Incorporated Areas				
Sheyenne River	Approximately 1,064 feet upstream of Richland County boundary.	None	+990	City of Fort Ransom, City of Lisbon, Unincorporated Areas of Ransom County.
	Approximately 7,465 feet downstream of State Highway 46.	None	+1,160	

* National Geodetic Vertical Datum.

Depth in feet above ground.

+ North American Vertical Datum.

^ Mean Sea Level, rounded to the nearest 0.1 meter.

** BFEs to be changed include the listed downstream and upstream BFEs, and include BFEs located on the stream reach between the referenced locations above. Please refer to the revised Flood Insurance Rate Map located at the community map repository (see below) for exact locations of all BFEs to be changed.

Anthropomorphic Test Devices; Hybrid III Test Dummy, ES-2re Side Impact Crash Test Dummy

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes corrections or minor changes to some of the drawings incorporated by reference

by a final rule, published on June 16, 2008, that responded to petitions for reconsideration of a December 2006 final rule that had adopted specifications and qualification requirements for a new crash test dummy called the "ES-2re" test dummy. The ES-2re is a 50th percentile adult male side impact crash test dummy that will be used in an upgraded Federal motor vehicle safety standard on side impact protection and in the agency's New Car Assessment Program. This NPRM responds to requests from test dummy manufacturers First Technology Safety Systems (FTSS) and Denton ATD (Denton) to correct or make minor adjustments to the drawings of the ES-2re. This NPRM would also correct dimensional errors in Figure 22 of 49 CFR part 572, subpart E, which depicts the pendulum used in the neck qualification tests of several of the crash test dummies, including the Hybrid III and ES-2re test dummies.
