SUPPLEMENTARY INFORMATION:

I. Abstract

Historically, changes in fisheries management regulations have been shown to result in impacts to individuals within the fishery. An understanding of social impacts in fisheries—achieved through the collection of data on fishing communities, as well as on individuals who fish—is a requirement under several federal laws. Laws such as the National Environmental Protection Act and the Magnuson Stevens Fishery Conservation Act (as amended 2007) describe such requirements. The collection of this data not only helps to inform legal requirements for the existing management actions, but will inform future management actions requiring equivalent information.

Fisheries rationalization programs have an impact on those individuals participating in the affected fishery. The Pacific Fisheries Management Council is on track to implement a new rationalization program for the Pacific Coast Groundfish limited entry trawl fishery in January 2011. This research aims to study the individuals in the affected fishery both prior to and after the implementation of the rationalization program. The data collected will provide a baseline description of the industry as well as allow for analysis of changes the rationalization program may create for individuals in the fishery. The measurement of these changes will lead to a greater understanding of the social impacts the management measure may have on the individuals in the fishery. To achieve these goals it is critical to collect the necessary data prior to the implementation of the rationalization program for comparison to data collected after the management program has been implemented. This study will be inclusive of both a Phase 1 pre-implementation data collection effort, as well as a Phase 2, post-implementation data collection effort to achieve the stated objectives.

II. Method of Collection

Literature reviews, secondary sources including Internet sources, United States Census data, key informants, focus groups, paper surveys, electronic

surveys, and in-person interviews will be utilized in combination to obtain the greatest breadth of information as possible.
