SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the correct format, reporting burden (time and costs) is minimal, collection instruments are clearly understandable, and OSHA's estimate of the information collection burden is correct. The Occupational Safety and Health Act of 1970 (OSH Act; 29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657).

Sections 6(b)6(A), 6(b)6(B), 6(b)6(C), 6(d), and 16 of the OSH Act, and 29 CFR 1905.10, 1905.11, and 1905.12, specify the procedures that employers must follow to apply for a variance from the requirements of an OSHA standard. OSHA uses the information collected under these procedures to: (1) Evaluate the employer's claim that the alternative means of compliance would provide affected employees with the requisite level of health and safety protection; (2) assess the technical feasibility of the alternative means of compliance; (3) determine that the employer properly notified affected employees of the variance application and their right to a hearing; and (4) verify that the application contains the administrative information required by the applicable variance regulation. Currently, no specific forms are available for preparing variance applications and other documents that may accompany variance applications. OSHA is developing new forms to assist

employers in preparing variance applications that comply with the information collection requirements contained in the OSH Act and variance regulations.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected;
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques; and
- Whether providing variance application forms on the Agency's Web site would reduce the burden on employers applying for variances.

III. Proposed Actions

OSHA is requesting OMB approval for the information collection (paperwork) requirements contained in Sections 6(b)6(A), 6(b)6(B), 6(b)6(C), 6(d), and 16 of the Occupational Safety and Health Act of 1970, and 29 CFR 1905.10, 1905.11, and 1905.12. These statutory and regulatory provisions specify the requirements for submitting applications to OSHA for temporary, experimental, permanent, and national defense variances.

OSHA also is requesting OMB approval to develop and use variance application forms for the four types of variances specified by the OSH Act and variance regulations. The four types of variances are: Temporary variances (Section 6(b)6(A) of the Act; 29 U.S.C. 655; 29 CFR 1905.10); experimental variances (Section 6(b)6(C) of the Act; 29 U.S.C. 655); permanent variances (Section 6(d) of the Act; 29 U.S.C. 655; 29 CFR 1905.11); and national defense variances (Section 16 of the Act; 29 U.S.C. 665; 29 CFR 1905.12). The variance regulations specify the information that employers must provide when requesting one of these variances. The variance application forms would organize and clarify the information collection requirements for each type of variance by specifying the requirements in comprehensible language, and providing explanatory material. Employers applying for a variance could download and complete

the applicable form from OSHA's Web site. The forms would expedite the application process for employers, and ensure that the information on the application is complete and accurate.

The Agency will summarize the comments submitted in response to this notice, and will include this summary in its request to OMB to approve these information collection requirements and variance application forms.

Type of Review: Existing collection in use without an OMB control number.

Title: Information Collection Requirements for the Variance Regulations.

OMB Number: 1218-0NEW.

Affected Public: Business or other for-profit and not-for-profit institutions.

Number of Respondents: 12.

Frequency of Recordkeeping: On occasion.

Total Responses: 12.

Average Time per Response: Ranges from 2 hours for an employer to assemble the application documents to 16 hours to locate and assemble information required to complete an application.

Estimated Total Burden Hours: 366.

Estimated Cost (Operation and Maintenance): \$0.

IV. Public Participation: Submission of Comments on This Notice and Internet Access to Comments and Submissions

Submit comments in response to this document: (1) Electronically at <http://www.regulations.gov>, which is the Federal eRulemaking Portal; (2) by facsimile (fax); or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number for the ICR (OSHA Docket No. OSHA-2009-0024). To supplement electronic submissions, upload document files electronically. Send hard copies of materials to supplement electronic or facsimile submissions to the OSHA Docket Office (see the **ADDRESSES** section of this notice). The additional materials must clearly identify the associated electronic comments by name, date, and docket number so OSHA can attach them to the comments. Note that security-related procedures may result in significant delays in receiving comments and other written materials by regular mail. Contact the OSHA Docket Office at (202) 693-2350 (TTY (877) 889-5627) for information about security procedures concerning delivery of materials by express mail, or messenger or courier service. The applicant will continue analysis of a cold-functioning chaperonin protein folding system from testis tissue of the Antarctica fish, *Gobionotothen gibberifrons*. To demonstrate that the chaperonin is functional, they must use protein substrates labeled with ³⁵S-methionine. To obtain these proteins, they will express *G. gibberifrons* actin and tubulin substrates in *E. coli* in a medium supplemented with ³⁵S-methionine.

The *E. coli* will not be released to the environment. Cultures will be autoclaved to kill the bacteria, and the waste will be disposed via the radioactive materials waste stream using approved protocols.
