SUPPLEMENTARY INFORMATION:

I. Abstract

The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) uses a system of permits and certificates to help ensure that international trade is legal and does not threaten the survival of wildlife or plant species in the wild. Prior to the import or export of CITES-listed species, the Management Authority and Scientific Authority must make appropriate determinations and issue CITES documents. Section 8A of the Endangered Species Act (16 U.S.C. 1531 et seq.) designates the Secretary of the Interior as the U.S. Management Authority and U.S. Scientific Authority for CITES. The Secretary delegated these authorities to the Fish and Wildlife Service.

Before a country can issue an export permit for CITES Appendix I or II specimens, the CITES Scientific Authority of the exporting country must determine that the export will not be detrimental to the species, and the Management Authority must be satisfied that the specimens were acquired legally. For the export of Appendix III specimens, the Management Authority must be satisfied that the specimens were acquired legally (CITES does not require findings from the Scientific Authority). Prior to the importation of Appendix I specimens, both the Scientific Authority and the Management Authority of the importing country must make required findings. The Scientific Authority must also monitor trade of all species to ensure that the level of trade is sustainable.

Article VIII(3) of the treaty states that participating parties should make efforts to ensure that CITES specimens are traded with a minimum of delay. Section XII of Resolution Conf. 12.3 (Rev. CoP13) recommends use of simplified procedures for issuing CITES documents to expedite trade that will have no impact, or a negligible impact, on conservation of the species involved.

We use FWS Form 3-200-74 (Single-Use Export Permits Under a Master File or Annual Program File (CITES)) to streamline the application process for CITES documents that involve multiple,

similar actions over a given amount of time. For the initial application, respondents use forms designed specifically to address their particular activity (approved under OMB Control No. 1018-0093). From information in the application, we create a master file or annual program file that contains all the information necessary for us to make the required legal acquisition and nondetriment findings. The applicant can then submit FWS Form 3-200-74 to request authorization to carry out multiple, identical activities over the next 6 months. On FWS Form 3-200-74, we request information only about the number of additional documents the applicant requires to carry out activities approved under the previous application process. By referencing information in the master file or annual program file, we can quickly issue partially completed CITES documents (with certain specific areas left blank for completion by the applicant).

United States facilities, such as farms and aquaculture operations, produce several native U.S. taxa listed in CITES Appendices II and III in closed and semi-closed production systems. By registering a production facility and setting up a master file, we can expedite issuance of export permits for that facility. The registration is valid for 1 year. We use FWS Form 3-200-75 (Registration of a Production Facility for Export of Certain Native Species (CITES)) to collect information on annual production levels, method of producing specimens, source of the parental and founder stock, and method of transport for international trade. This information allows us to issue documents on a very short turnaround time, and we do not need to collect additional information prior to the issuance of export documents.
