**SUPPLEMENTARY INFORMATION:****Background And Purpose**

A Certificate of Alternative Compliance, as allowed under Title 33 of the Code of Federal Regulation, Parts 81 and 89, has been issued for the offshore supply vessel CALLAIS PROVIDER. The horizontal distance between the forward and aft masthead lights may be 20'-8<sup>5</sup>/<sub>8</sub>". Placing the aft masthead light at the horizontal distance from the forward masthead light as required by Annex I, paragraph 3(a) of the 72 COLREGS, and Annex I, Section 84.05(a) of the Inland Rules Act, would result in an aft masthead light location directly over the cargo deck where it would interfere with loading and unloading operations. The offset from centerline of the RAM/NUC lights may be 3'. Offsetting the RAM/NUC lights 2 meters from the centerline as required by Annex I paragraph 3(c) of the 72 COLREGS and Annex I, Section 84.05(c) of the Inland rules Act would place them in an exposed position beyond the width of the aft end of the pilothouse.

The Certificate of Alternative Compliance allows for the horizontal separation of the forward and aft masthead lights to deviate from the requirements of Annex I, paragraph 3(a) of 72 COLREGS, and Annex I, Section 84.05(a) of the Inland Rules Act as well as the offset of the RAM/NUC lights to deviate from the requirements of Annex I, paragraph 3(c) of 72 COLREGS and Annex I, Section 84.05(c) of the Inland Rules Act.

This notice is issued under authority of 33 U.S.C. 1605(c), and 33 CFR 81.18.
