#### **SUPPLEMENTARY INFORMATION:**

##### **I. Background**

The Evaluation of the Technology-Based Learning (TBL) Grants is a two-year evaluation of grantees funded under the Employment and Training Administration's (ETA) TBL Initiative (73 FR 35155 (June 20, 2008)) to implement TBL programs that increase worker access to training in a timely and effective manner, while simultaneously stimulating the development of new and innovative models and uses for TBL in the public workforce system. The evaluation will document and assess learners' experiences and outcomes related to participating in such a program, and the implications for the public workforce system.

As a key part of the TBL evaluation, ETA's contractor will collect administrative data from grantees and administer a customer survey. The customer survey will provide information on customer satisfaction and participant outcomes, and thus inform future TBL projects. Since grantees are presently reporting only limited data about TBL participants to ETA, reasons for participation, challenges to participation, other workforce services received, and, of particular importance, satisfaction with TBL training and services would not otherwise be available in the absence of the survey. Thus, in order to more thoroughly evaluate the TBL program, participation, outcomes and satisfaction data will be gathered from both the limited administrative data and the customer survey.

The survey will be conducted online and will provide basic demographic, programmatic, and outcome information on participants in TBL programs, and supply participants' contact information for survey administration.

##### **II. Review Focus**

The Department of Labor is particularly interested in comments which:
