# Application(s) for Duty–Free Entry of Scientific Instruments

Pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, as amended by Pub. L. 106–36; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be postmarked on or before April 12, 2010. Address written comments to Statutory Import Programs Staff, Room 3720, U.S. Department of Commerce, Washington, D.C. 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. at the U.S. Department of Commerce in Room 3720.

Docket Number: 10-004. Applicant: State University of New York College at Geneseo, Erwin Hall 218, 1 College Circle, Geneseo, NY 14454. Instrument: MultiView 2000TS Microscope System. Manufacturer: Nanonics Imaging Ltd., Israel. Intended Use: This instrument will be used, among other things, to study the folding structure of A-beta proteins around nanostructures. This instrument combines an optical microscope with a scanning probe imaging system. Specifically, this instrument can perform near-field scanning optical microscopy. A pertinent feature of this instrument is the ability to switch between scanning the tip and the sample stage. It is also well suited for soft materials than other instruments, as it detects the probe coming close to the sample surface by monitoring a frequency shift in a nanotuning fork. Other unique features include the ability to use conventional AFM type silicon cantilevers as well as cantilevered optical fiber probes with exposed probe geometry, providing normal force sensing; the capability to image side walls with an exposed tip glass AFM probe and the ability to image in both NSOM and AFM with AC operating modes. Justification for Duty-Free Entry: No instruments of same general category are believed to be manufactured in the United States. Application accepted by Commissioner of Customs: March 10, 2010.

Dated: March 16, 2010.

Docket Number: 09-067. Applicant: West Virginia University, One Waterfront Place, PO Box 6024, Morgantown, WV 26506. Instrument: Electron Microscope. Manufacturer: JEOL, Japan. Intended Use: The instrument will be used to study the microstructure and chemistry of a variety of metallic, ceramic and semiconductor materials. This instrument is capable of imaging crystal structure and defects from the micron to atomic scale using TEM and HREM. A unique feature of this instrument is an analytical pole piece for high resolution work while maintaining high tilting capability. Justification for Duty-Free Entry: There are no domestic manufacturers of this type of electron microscope. Application accepted by Commissioner of Customs: December 17, 2009.

Docket Number: 10–003. Applicant: St. Lawrence University, 23 Romoda Drive, Canton, NY 13617. Instrument: Electron Microscope. Manufacturer: FEI, Czech Republic, Intended Use: This instrument will be used in the advanced study of diverse fields such as geochemistry, sedimentology and neurophysiology. This instrument has several SE detectors that are optimized for use in high-vacuum, low-vacuum and ultra-low vacuum environments and can be freely switched between these three modes. This allows for the investigation of conductive, nonconductive and high vacuum incompatible specimens. Justification for Duty-Free Entry: No instruments of same general category are manufactured in the United States. Application accepted by Commissioner of Customs: March 3, 2010.

# Classification

# Limitation of Liability

In no event will NOAA or the Department of Commerce be responsible for proposal preparation costs if this program is cancelled because of other agency priorities. Publication of this announcement does not oblige NOAA to award any specific project or to obligate any available funds. Applicants are hereby given notice that funding for the Fiscal Year 2010 program is contingent upon the availability of Fiscal Year 2010 appropriations.

### Universal Identifier

Applicants should be aware they are required to provide a Dun and Bradstreet Data Universal Numbering System (DUNS) number during the application process. See the October 30, 2002, **Federal Register**, (67, FR 66177) for additional information. Organizations can receive a DUNS number at no cost by calling the dedicated toll-free DUNS Number request line at 1–866–705–5711 or via the Internet at http://www.dunandbradstreet.com.

# National Environmental Policy Act (NEPA)

NOAA must analyze the potential environmental impacts, as required by the National Environmental Policy Act (NEPA), for applicant projects or

proposals which are seeking NOAA federal funding opportunities. Detailed information on NOAA compliance with NEPA can be found at the following NOAA NEPA website: http:// www.nepa.noaa.gov/, including our NOAA Administrative Order 216–6 for NEPA, http://www.nepa.noaa.gov/ NAO216\_6\_TOC.pdf, and the Council on Environmental Quality implementation regulations, http:// ceq.eh.doe.gov/nepa/regs/ceq/ toc ceq.htm. Consequently, as part of an applicant's package, and under their description of their program activities, applicants are required to provide detailed information on the activities to be conducted, locations, sites, species and habitat to be affected, possible construction activities, and any environmental concerns that may exist (e.g., the use and disposal of hazardous or toxic chemicals, introduction of nonindigenous species, impacts to endangered and threatened species, aquaculture projects, and impacts to coral reef systems). In addition to providing specific information that will serve as the basis for any required impact analyses, applicants may also be requested to assist NOAA in drafting of an environmental assessment, if NOAA determines an assessment is required. Applicants will also be required to cooperate with NOAA in identifying feasible measures to reduce or avoid any identified adverse environmental impacts of their proposal. The failure to do so shall be grounds for not selecting an application. In some cases if additional information is required after an application is selected, funds can be withheld by the Grants Officer under a special award condition requiring the recipient to submit additional environmental compliance information sufficient to enable NOAA to make an assessment on any impacts that a project may have on the environment.

The Department of Commerce Preaward Notification Requirements for Grants and Cooperative Agreements contained in the **Federal Register** notice of October 1, 2001 (66 FR 49917), as amended by the **Federal Register** notice published on: October 30, 2002 (67 FR 66109); December 30, 2004 (69 FR 78389); and February 11, 2008 (73 FR 7696) are applicable to this solicitation.

Puerto Rico. Researchers would annually capture up to 320 hawksbill and 252 green sea turtles by hand or entanglement net. Turtles would be measured, weighed, tagged, and blood or skin biopsy sampled. A subset of up to 10 hawksbill and 10 green sea turtles per year would be satellite tagged. A subset of up to 10 green turtles per year from the Culebra study sites may undergo fibropapillomatosis tumor removal surgery and subsequent rehabilitation.

In the case of a green turtle evidencing severe internal tumors, the turtle may be euthanized; this is not expected to apply to more than 2 turtles per year. The permit is requested for 5 years.

Dated: March 16, 2010.
