Definition of Terms

Components of Census Coverage—The four components of census coverage are census omissions (missed persons or housing units), erroneous enumerations (persons or housing units), correct enumerations, and whole-person imputations (census person enumerations on which we did not collect sufficient information). Examples of erroneous enumerations are persons or housing units enumerated in the census that should not have been enumerated at all, persons or housing units enumerated in an incorrect location, and persons or housing units enumerated more than once (duplicates).

Net Coverage Error—Net Coverage Error is the difference between the estimate of the true population count and the actual census count. A positive net error indicates an undercount, while a negative net error indicates an overcount.
