Finally, there is no change in the Commission's burden estimates.

The data collected by FCC Form 502 helps the Commission manage the ten-digit North American Numbering Plan (NANP), which is currently being used by the United States and 19 other countries. Under the Communications Act of 1934, as amended, the Commission was given “exclusive jurisdictions over those portions of the North American Numbering Plan that pertain to the United States.” Pursuant to that authority the Commission conducted a rulemaking in March 2000 that the Commission found that mandatory data collection is necessary to efficiently monitor and manage numbering use. The Commission received OMB approval for this requirement and the following: (a) Utilization/Forecast Report; (b) application for initial numbering resource; (c) application for growth numbering resources; (d) recordkeeping requirement; (e) notifications by state commissions, (f) demonstration to state

commission, and (g) petitions for additional delegation of numbering authority.

The data from this information collection is used by the FCC, state regulatory commissions, and the NANPA to monitor numbering resource utilization by all carriers using the resource and to project the dates of area code and NANP exhaust.

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission for Extension Under Delegated Authority, Comments Requested

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0228.
Title: Section 80.59, Compulsory Ship Inspections.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, and state, local or tribal government.

Number of Respondents and Responses: 100 respondents; 100 responses.

Estimated Time Per Response: 2 hours.

Frequency of Response: On occasion reporting requirement and recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. sections 154, 303, 307(e), 309, and 332.

Total Annual Burden: 200 hours.

Total Annual Cost: N/A.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: There is no need for confidentiality.

Needs and Uses: The Commission will submit this expiring information collection to the Office of Management and Budget in order to obtain the full three year clearance from them. The Commission is requesting an extension (no change in the reporting and/or recordkeeping requirement). There is a 260 hour reduction in the total annual burden which is due to fewer respondents subject to these requirements and a decrease in the number of vessels requesting waivers.

The requirements contained in section 80.59 of the Commission's rules are necessary to implement the provisions of section 362(b) of the Communications Act of 1934, as amended. Section 80.59(d) states that the Commission may, upon a finding

that the public interest would be served, grant a waiver of the annual inspection required by section 362(b), for a period of not more than 90 days for the sole purpose of enabling the United States vessel to complete its voyage and proceed to a port in the United States when an inspection can be held. An information application must be submitted by a ship's owner, operator, or authorized agent. The application must be submitted to the Commission's District Director or Resident Agent in charge of the FCC office nearest the port of arrival at least three days for the ship's arrival. The application must provide the specific information in section 80.59.

Although this rule section also requires notation in the ship's station log that certifies that the ship has/has not passed inspection, that requirement has been accounted for in OMB Control Number 3060-0835.

The information is used by FCC staff to determine the eligibility of a vessel for a waiver of the required annual radio station inspection, pursuant to section 362(b) of the Communications Act of 1934, as amended. If the collection were not conducted, the Commission would be unable to grant eligible vessels waivers and such ships would be unable to sail until an inspection was performed. This, in turn, would require an increased expenditure for agency travel funds and/or additional personnel, as well as additional operating costs for vessels required to remain in port until an inspection can be completed.
