In addition, before using rope which has been idle for at least a month, it must be inspected as prescribed by paragraph (g)(3) and a record prepared to certify that the inspection was done. The certification records must include the inspection date, the signature of the person conducting the inspection, and the identifier of the rope inspected. Employers must keep the certification records on file and available for inspection. The certification records provide employers, workers, and OSHA compliance officers with assurance that the ropes are in good condition.

Disclosure of Charts Under Paragraph (c) and Inspection Certification Records Under Paragraph (g). The Standard requires the disclosure of charts and inspection certification records if requested during an OSHA inspection.

- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

from two consecutive ACCSH meetings may be removed or replaced. No member of ACCSH, other than members who represent employers or employees, shall have an economic interest in any proposed rule that affects the construction industry (29 CFR 1912.6).
