Fish and Wildlife Service

[FWS-R8-ES-2010-N074; 1112-0000-81440-F2]

Endangered and Threatened Wildlife and Plants; Permit, Santa Cruz County, CA

AGENCY: U.S. Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), have received an application from Todd and Lisa Mansfield (applicants) for an incidental take permit under the Endangered Species Act of 1973, as amended (Act). We are considering issuing a permit that would authorize the applicants' take of the federally endangered Mount Hermon June beetle (*Polyphylla barbata*) incidental to otherwise lawful activities that would result in the permanent loss of 483 square feet of habitat for the species in Scotts Valley, Santa Cruz County, California. We invite comments from the public on the application, which includes a Habitat Conservation Plan (HCP) that fully describes the proposed project and measures the applicants would undertake to minimize and mitigate anticipated take of the species. We also invite comments on our preliminary determination that the HCP qualifies as a "low-effect" plan, eligible for a categorical exclusion under the National Environmental Policy Act (NEPA) of 1969, as amended. We explain the basis for this determination in our draft Environmental Action Statement and associated Low-Effect Screening Form, both of which are also available for review.
