SUPPLEMENTARY INFORMATION:

Background: The National Institute of Corrections (NIC) has identified six key elements in the effective management of inmate behavior in jails: (1) Assessing the risks and needs of each inmate at various points during his/her detention; (2) Assigning inmates to appropriate housing; (3) Meeting inmates' basic needs; (4) Defining and conveying expectations for inmate behavior; (5) Supervising inmates; and (6) Keeping inmates productively occupied.

If a jail fully and properly implements all six elements, it should experience a significant reduction in the unwanted and negative inmate behavior often experienced in jails, such as vandalism, violence, rule violations, and disrespectful behavior toward staff and other inmates.

Purpose: The NIC Jails Division offers training and technical assistance on inmate behavior management, but wishes to develop additional tools that will help jails implement the individual elements.

Scope of Work: The National Institute of Corrections wishes to produce two documents that provide jail practitioners specific guidance on, and tools for, implementing elements #3 and #4 in their own jurisdiction as part of the overall inmate behavior management strategy.

Document Length: The number of pages in the body is to be determined.

The documents will include appendices and a bibliography.

Document Audience: Jail administrators and management staff. This guide is intended for use by jails of all sizes. In developing the document, the awardee must take into account the diversity of jails in terms of size and resources, and the sometimes severe resource limitations many jails face.

Use of Document: Jail practitioners will use these documents as guides on meeting inmates' basic needs, and defining and conveying expectations for inmates, as part of an overall strategy to manage inmate behavior. They will be companion documents as part of a set of materials NIC is developing on inmate behavior management.

Document Distribution: NIC expects to distribute the documents widely. They will be made available on the NIC Web site and through the NIC Information Center, upon request and free of charge.

Document Content: Document content will reflect and expand on the information in NIC's "Inmate Behavior Management: The Key to a Safe and Secure Jail". This document is available at <http://nic.gov/library/023882>.

The documents will be clear and practical guides for jail practitioners. They will have a common format, which will be developed by the awardee in conjunction with NIC staff. Each document will include, at a minimum: An overview of the six key elements of inmate behavior management; An in-depth discussion of the individual element; What the document addresses, including why it is key to managing inmate behavior, its relationship to the other five elements, the benefits of implementing the element, and the potential consequences of failing to implement it (this discussion will also cite anecdotal evidence or research that demonstrates the usefulness of the element in managing inmate behavior); a discussion of processes and indicators that can be used to assess the degree to which a jail currently implements the element, with sample assessment tools; Specific strategies for fully implementing the element; a discussion of the associated policies and procedures, staff training, staff supervision strategies, and resource requirements to successfully implement the element (the document will include samples of policies, procedures, staff training tools, information for inmates, and other related documents); guidance on how to set realistic and measurable goals for element implementation; suggested processes for evaluating both the quality of the implementation and the success in achieving goals (For each

type of evaluation, the document will describe evaluation timeframes, data that should be collected, data collection methods, and data collection analysis); a discussion of the importance of the administrator's commitment to implementing the element; and concrete examples of how the administrator can demonstrate this commitment.

Project Description: The awardee will produce two completed documents that have received initial editing from a professional editor. NIC will be responsible for the final editing process and document design, but the awardee will remain available during this time to answer questions and to make revisions to the documents.

Project Schedule: The list below shows the major activities required to complete the project. Document development will begin upon award of this agreement and must be complete 18 months after the award date. The schedule for completion of activities should include, at a minimum, the following activities. The awardee will: Meet with the NIC project manager for an overview of the project and initial planning; Review materials provided by NIC; complete the initial outline of document content and layout; Meet with the NIC project manager by WebEx to review, discuss, and agree on the content outline; research content topics and related resources; Submit draft sections of the document to NIC for review; revise draft sections for NIC's approval; submit document to the editor hired by the awardee for the first content edit; submit a draft of entire document to NIC for review; Revise the document for NIC's approval; and submit the document to NIC in hard copy and on disk in Microsoft Word format.

Throughout the project period, the awardee will make provisions for meetings with NIC staff, to be held in Washington DC or via WebEx, at critical planning and review points in document development.

Document Preparation: For all awards in which a document will be a deliverable, the awardee must follow the guidelines listed herein, as well as follow the Guidelines for Preparing and Submitting Manuscripts for Publication as found in the "General Guidelines for Cooperative Agreements," which will be included in the award package. All final publications submitted for posting on the NIC Web site must meet the Federal government's requirement for accessibility (508 PDF or HTML file).
