Title: NSPS for Automobile and Light Duty Truck Surface Coating Operations (Renewal).

ICR Numbers: EPA ICR Number 1064.16, OMB Control Number 2060-0034.

ICR Status: This ICR is scheduled to expire on June 30, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of

information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The New Source Performance Standards (NSPS) for Automobile and Light Duty Truck Surface Coating Operations (40 CFR part 60, subpart MM) were proposed on October 5, 1979, and promulgated on December 24, 1980 (45 FR 85415).

Owners or operators of the affected facilities must make an initial notification, performance tests, periodic reports, and maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 483 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Automobile and light duty truck surface coating operations.

Estimated Number of Respondents: 54.

Frequency of Response: Initially, occasionally, quarterly, and semiannually.

Estimated Total Annual Hour Burden: 156,362

Estimated Total Annual Cost: \$14,882,842, which includes: \$14,790,142 in labor costs, \$1,700 in capital/startup costs, and \$91,000 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is a decrease in the average estimated burden as currently identified in the OMB Inventory of Approved Burdens. This decrease is not due to any program changes. The total estimated annual hour burden remained the same but the change in the average burden estimates occurred due to an incorrect calculation of the number of responses in the previous ICR. Further, the reduction in Agency burden from 760 to 708 is a result of a rounding error in the previous burden estimate.

Dated: April 22, 2010.

John Moses,

Director, Collection Strategies Division.

Clean Air Act Operating Permit Program; Petition To Object to Title V Permit for Wheelabrator Baltimore, L.P., Baltimore City, MD

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final action.

SUMMARY: Pursuant to section 505(b)(2) of the Clean Air Act (CAA), the EPA Administrator signed an order, dated April 14, 2010, partially granting and partially denying a petition to object to a state operating permit proposed to be issued by the Maryland Department of the Environment (MDE) to Wheelabrator Baltimore, L.P. for its facility located in Baltimore City, Maryland. This order constitutes final action on the petition filed by the Environmental Integrity Project, the Baltimore Harbor Waterkeeper, Inc., and Clean Water Action (Petitioners), dated May 21, 2009, requesting that the Administrator object to the issuance of the proposed title V permit.

Pursuant to section 505(b)(2) of the CAA, the petitioner may seek judicial review of those portions of the petition which EPA denied in the United States Court of Appeals for the appropriate circuit. Any petition for review shall be filed within 60 days of this notice in accordance with the requirements of section 307 of the CAA.

ADDRESSES: Copies of the final order, the petition, and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region III, Air Protection Division (APD), 1650 Arch St., Philadelphia, Pennsylvania 19103. The final order is also available electronically at the following Web site: <http://www.epa.gov/region07/programs/artd/air/title5/petitionb/petitiondb.htm>.

FOR FURTHER INFORMATION CONTACT: Amy Caprio, Air Protection Division, EPA Region III, telephone (215) 814-2156, or by e-mail at caprio.amy@epa.gov.

SUPPLEMENTARY INFORMATION: The Clean Air Act (CAA) affords EPA a 45-day period to review and object to, as appropriate, operating permits proposed by state permitting authorities. Section 505(b)(2) of the CAA authorizes any person to petition the EPA Administrator within 60 days after the expiration of this review period to object to a state operating permit if EPA has not done so. Petitions must be based only on objections raised with reasonable specificity during the public comment period, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period or that the grounds for objection or other issue arose after the comment period.

EPA received a petition from the Petitioners, dated May 21, 2009, requesting that EPA object to the issuance of the proposed title V permit for Wheelabrator Baltimore, L.P. because: (1) Of illegal weakening of the title V permit conditions; (2) inadequate monitoring methodology; and (3) inadequate monitoring requirements for particulate matter, mercury, lead, hydrogen chloride and dioxins/furans. The order explains the reasons behind EPA's decision to partially grant and partially deny the petition for objection.

Dated: April 19, 2010.

W.C. Early,

Acting Regional Administrator, Region III.
