Title: Common Core of Data—Teacher Compensation Survey (TCS): 2010–2013.

Frequency: Annually.

Affected Public: State, Local, or Tribal Gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden:

Responses: 30.

Burden Hours: 2,580.

Abstract: National data on teachers are limited to periodic sample surveys or to simple counts at the district or school level. In response to the need for individual teacher-level data, the National Center for Education Statistics (NCES) developed the Teacher Compensation Survey (TCS), an administrative records survey that collects total compensation, teacher status, and demographic data about individual teachers from multiple states. In 2007, NCES launched the pilot TCS data collection, with seven states volunteering to provide administrative records for school year (SY) 2005–06. In the second year of the data collection, the TCS expanded to 17 states reporting SY 2006–07 data. The information

collected from these records included base salary, total salary, benefits, highest level of education, years of teaching experience, gender, and race/ethnicity for each teacher. The TCS file can be merged with the Common Core of Data (CCD) Public Elementary/Secondary School Universe Survey file to obtain such school information as school type, operational status, locale code, number of students eligible for free and reduced-price lunch, student enrollment by grade, race/ethnicity, and gender, and pupil/teacher ratio. NCES will continue to request data from more states and to make the data more comparable across states. It is anticipated that up to thirty-five states will volunteer to participate in the TCS from 2010 to 2013.
