

National Management Strategy for Motorized OHV Use on Public Lands and transportation and travel management policy.

8. Motorized travel routes designated through the Red Cliffs Desert Reserve Public Use Plan (2001) will be carried forward under one or more alternatives.

9. At least one alternative will identify a "northern transportation corridor," as mandated by Public Law 111-11.

You may submit comments on issues and planning criteria to the BLM in writing, at any public scoping meeting, or you may submit them to the BLM using one of the methods listed in the **ADDRESSES** section above. In order to be considered in this planning process, all comments must be received prior to the close of the scoping period or 30 days after the last public meeting, whichever is later. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. The minutes and list of attendees for each scoping meeting will be available to the public and open for 30 days after the meeting to any participant who wishes to clarify the views he or she expressed. The BLM will evaluate identified issues to be addressed in the plan, and will place them into one of three categories:

1. Issues to be resolved in the planning process;
2. Issues to be resolved through policy or administrative action; or
3. Issues beyond the scope of this planning process.

The BLM will provide an explanation in the Draft Plans and Amendment/EIS as to why an issue was placed in category two or three. The public is also encouraged to help identify any management questions and concerns that should be addressed in the plan. The BLM will work collaboratively with interested parties to identify the management decisions that are best suited to local, regional, and national needs and concerns.

The BLM will use an interdisciplinary team approach in the planning process to consider the variety of resource issues and concerns identified. Specialists with expertise in the following disciplines will be involved in the planning process: Air quality, archeology, biology, botany, climate change, ecology, lands and realty, paleontology, recreation, socio-economics, and soils and vegetation.
